

Established in Aug 2021, KONFOONG BIOTECH INTERNATIONAL CO., LTD(KFBIO) aims to promote the development of digital pathology with the latest technology and concepts. KFBIO is the innovative national high-tech enterprise focusing on digital pathology. It's one of the few advocates of the end-to-end digital pathology solution in China. KFBIO has been rooted in the digital pathology industry for ten years, and has developed five business segments including the digital pathology slide scanners, telepathology platform, AI-assisted pathology diagnosis system, routine pathology equipment and pathology diagnosis services. It provides the most complete whole digital pathology workflow solution, from software to hardware to meet different needs of customers. KFBIO is dedicated to providing the end-to-end digital pathology solution together with the radiology, pathology, surgery and oncology professionals to make breakthrough achievements in diagnostics.
