Visual Anatomy & Structural Boundaries

Gemini Notebook

Formation Rules Checklist

00. **Pre-condition**: The market must be in a clearly defined downtrend.

01. **Candle 1**: A large bearish (Red) candle confirming heavy selling pressure.

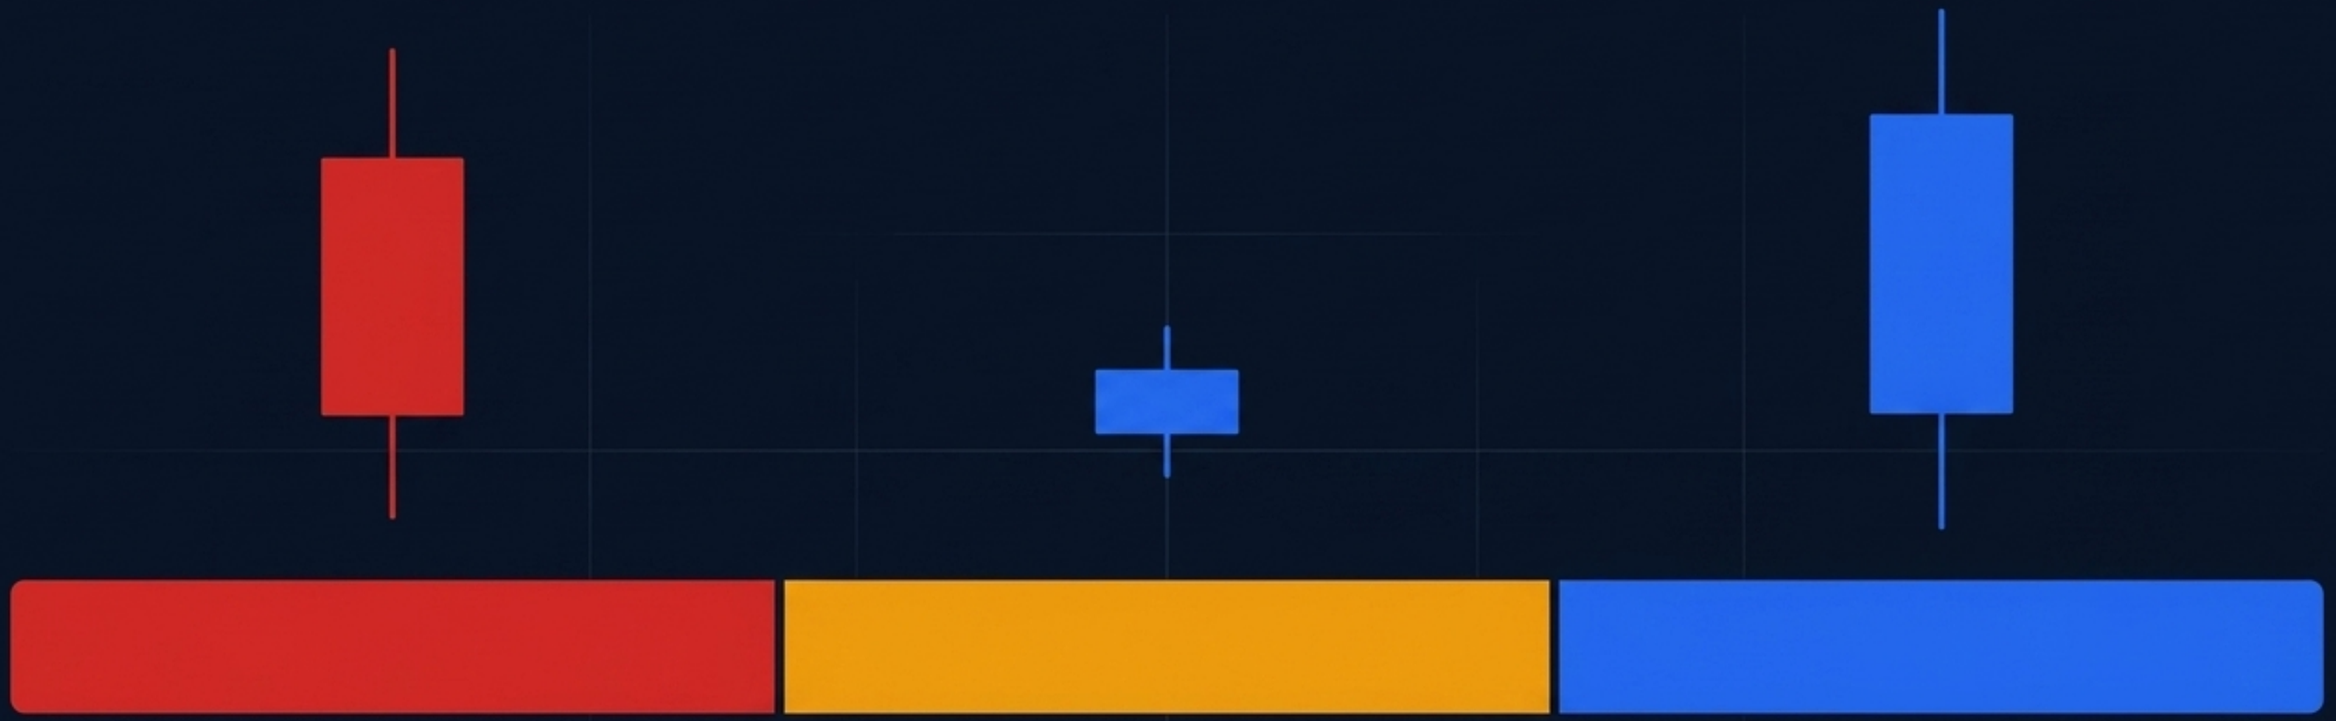

02. **Candle 2**: A small bullish (Blue) candle. Its real body must be entirely contained within the real body of Candle 1.

03. **Candle 3**: A large bullish (Blue) candle that closes definitively above the Open of Candle 1.

Gemini Notebook

Market Psychology: The Narrative Shift

Phase 1: Bearish Dominance

Sellers push prices lower, projecting false confidence in trend continuation.

Phase 2: Momentum Stall

Selling dries up. Buyers step in, preventing lower lows and creating a tight consolidation phase.

Phase 3: Bullish Takeover

Buyers aggressively overwhelm remaining sellers, trapping short-sellers and sparking a sharp upward reversal.

Execution Triggers: The Confirmation Protocol

Unconfirmed: Candle Still Forming

Confirmed: Candle Officially Closed

The Confirmation Protocol

- Never anticipate the close. A pattern is only valid once Candle 3 has fully closed above Candle 1's open.
- Intraday volatility can cause a bullish-looking Candle 3 to collapse into a bearish wick before the period ends.
- **Execution Trigger:** Enter strictly on the open of the 4th candle, or place a buy-stop order just above the high of Candle 3.

Gemini Notebook

Rookie vs. Pro Execution Matrix

ROOKIE MISTAKE	PROFESSIONAL STANDARD	SYSTEM OUTCOME
Ignoring the preceding trend (trading in sideways chop).	Only trading at the exhaustion point of a clear, established downtrend.	Avoids false signals and low-probability reversals.
Entering the trade before Candle 3 officially closes.	Waiting for definitive structural confirmation on the chosen timeframe.	Prevents getting trapped by late-stage bearish rejections.
Placing the Stop Loss too tight (e.g., inside Candle 2).	Anchoring the Stop Loss safely below the absolute lowest low of the entire 3-candle formation.	Protects against routine volatility wicks stopping out a valid trade.

Strategic Summary & Takeaways

CONTEXT

Requires a prior downtrend. Never trade in isolation or sideways chop.

STRUCTURE

Candle 2 must be fully engulfed by the real body of Candle 1. Candle 3 must close above Candle 1.

PSYCHOLOGY

Represents a complete transfer of power from exhausted sellers to aggressive buyers.

EXECUTION

Wait for the close of Candle 3. Risk is strictly defined below the pattern's lowest low.
