

**Replace Your Water-Cooled Endo Gas Coolers
with
'CST Endo Air Cooled Gas Coolers'**

100% Water & Shutdown Time Saving
Designed for 24x7 Industrial Duty — Proven and Running in Production Plants

CST ENDO GAS AIR COOLERS

Why Upgrade?

- Persistent breakdowns caused by water scaling, corrosion, and contamination
- High operating expenses due to frequent cleaning and maintenance shutdowns
- Leakage issues, pump failures, and choking of internal passages
- Unplanned downtime leading to **production loss and delayed deliveries**

Our Air-Cooled Solution

- **Zero-Water Operation** — no scaling, corrosion, or pump failures
- **24x7 uninterrupted furnace performance** and higher productivity
- **Maintenance-free, robust engineering design** for long-term reliability
- **Simple retrofit installation** to replace existing water-cooled systems
- **Significant reduction in operating costs** and improved process consistency

Applications

- Bearing Industry
- Forging & Heat-Treatment Plants
- Automobile Component Manufacturing
