

Paint

- No peeling or chipping paint if you have children under the age of seven and the house or apartment was built before 1978.

You should also think about:

- The types of locks on windows and doors
 - Are they safe and secure?
 - Have windows that you might like to open been nailed shut?
- The condition of the windows.
 - Are there small cracks in the panes?
- The amount of weatherization around doors and windows.
 - Are there storm windows?
 - Is there weather stripping? If you pay your own utilities, this may be important.
- The location of electric outlets and light fixtures.
- The condition of the paint and wallpaper
 - Are they worn, faded, or dirty?
- The condition of the floor.
 - Is it scratched and worn?

2. Kitchen

The Kitchen must have:

Ceiling

A ceiling that is in good condition.

- Not acceptable are large cracks or holes that allow drafts, severe bulging, large amounts of loose or falling surface material such as plaster.

Storage

Some space to store food.

Electricity

At least one electric outlet and one permanent light fixture.

Do not count table or floor lamps, ceiling lamps plugged into a socket, and extension cards; they are not permanent.

- Not acceptable are broken or frayed wiring, light fixtures hanging from wires with no other firm support (such as a chain), missing cover plates on switches or outlets, badly cracked outlets.

Stove and Oven

A stove (or range) and oven that works (This can be supplied by the tenant)

Floor

A floor that is in good condition.

Not acceptable are large cracks or holes, missing or warped floorboards or covering that could cause someone to trip.

Preparation Area

Some space to prepare food.

Paint

No peeling or chipping paint if you have children under the age of seven and the house or apartment was built before 1978.

Window

If there is a window, it must be in good condition.

Lock

A lock that works on all windows and doors that can be reached from the outside, a common public hallway, a fire escape, porch or other outside place that can be reached from the ground. A window that cannot be opened is acceptable.

Electricity

At least one permanent overhead or wall light fixture.

- Not acceptable are broken or frayed wiring, light fixtures hanging from wires with no other firm support (such as a chain), missing cover plates on switches or outlets, badly cracked outlets.

Sink

A sink with hot and cold running water.

- A kitchen sink will not satisfy this requirement.

You should also think about:

- The size of the bathroom and the amount of privacy.
- The appearances of the toilet, sink, and shower or tub.
- The appearance of the grout and seal along the floor and where the tub meets the wall.
- The appearance of the floor and walls.
- The size of the hot water heater.
- A cabinet with a mirror.

4. Other Rooms

Other rooms that are lived in include: bedrooms, dens, halls, and finished basements or enclosed, heated porches. The requirements for other rooms that are lived in are similar to the requirements for the living room as explained below.

Other Rooms Used for Living must have:

Ceiling

A ceiling that is in good condition.

- Not acceptable are large cracks or holes that allow drafts, severe bulging, large amounts of loose or falling surface material such as plaster,

Walls

Walls that are in good condition.

- Not acceptable are large cracks or holes that allow drafts, severe bulging or leaning, large amounts of loose or falling surface material such as plaster.

Paint

- No chipping or peeling paint if you have children under the age of seven and the house or apartment was built before 1978.

Electricity in Bedrooms

Same requirement as for living room.

In All Other Rooms Used for Living: There is no specific standard for electricity, but there must be either natural illumination (a window) or an electric light fixture or outlet.

Floor

A floor that is in good condition.

- Not acceptable are large cracks or holes, missing or warped floorboards or covering that could cause someone to trip.

Lock

A lock that works on all windows and doors that can be reached from the outside, a common public hallway, a fire escape, porch or other outside place that can be reached from the ground.

Cooling

Some windows that open, or some working ventilation or cooling equipment that can provide air circulation during warm months.

Plumbing

Pipes that are in good condition, with no leaks and no serious rust that causes the water to be discolored.

Water Heater

A water heater located, equipped, and installed in a safe manner. Ask the manager.

Heat

Enough heating equipment so that the unit can be made comfortably warm during cold months.

- Not acceptable are space heaters (or room heaters) that burn oil or gas and are not vented to a chimney. Space heaters that are vented may be acceptable if they can provide enough heat.

You should also think about:

- How well maintained the apartment is.
- The type of heating equipment.
 - Will it be able to supply enough heat for you in the winter, to all rooms used for living?
- The amount and type of weatherization and its affect on utility costs.
 - Is there insulation?
 - Are there storm windows?
 - Is there weather-stripping around the windows and doors?
- Air circulation or type of cooling equipment (if any).
 - Will the unit be cool enough for you in the summer?

6. Health and Safety

The Building and Site must have:

Smoke Detectors

At least one working smoke detector on each level of the unit, including the basement. If any member of your family is hearing-impaired, the smoke detector must have an alarm designed for hearing-impaired persons.

Fire Exits

The building must provide an alternate means of exit in case of fire (such as fire stairs or exit through windows, with the use of a ladder if windows are above the second floor).

Elevators

Make sure the elevators are safe and work properly.

Entrance

An entrance from the outside or from a public hall, so that it is not necessary to go through anyone else's private apartment to get into the unit.

Neighborhood

No dangerous places, spaces, or things in the neighborhood such as:

- Nearby buildings that are falling down
- Unprotected cliffs or quarries
- Fire hazards
- Evidence of flooding

Garbage

No large piles of trash and garbage inside or outside the unit, or in common areas such as hallways. There must be a space to store garbage (until pickup) that is covered tightly so that rats and other animals cannot get into it. Trash should be picked up regularly.

Lights

Lights that work in all common hallways and interior stairs.

Stairs and Hallways

Interior stairs with railings, and common hallways that are safe and in good condition. Minimal cracking, peeling or chipping in these areas.

Note: You may not be able to check these items listed here yourself, but the PHA Inspector will check them for you when the unit is inspected.

Now that you have finished this booklet, you know that for a house or apartment to be a good place to live, it must meet two kinds of housing quality standards:

- Things it must have in order to be approved for the Section 8 Rental Certificate Program and the Rental Voucher Program.
- Additional things that you should think about for the special needs of your family.

You know that these standards apply in six areas of a house or apartment.

1. Living Room
2. Kitchen
3. Bathroom
4. Other Rooms
5. Building Exterior, Plumbing and Heating
6. Health and Safety

You know that when a house or apartment meets the housing quality standards, it will be safe, healthy, and comfortable home for your family. It will be a good place to live.

After you find a good place to live, you can begin the *Request for Lease Approval* process. When both you and the owner have signed the *Request for Lease Approval* and the PHA has received it, an official inspection will take place. The PHA will inform both you and the owner of the inspection results.

If the house or apartment passed, a lease can be signed. There may still be some items that you or the PHA would like improved. If so, you and your PHA may be able to bargain for the improvements when you sign the lease. If the owner is not willing to do the work, perhaps you can get him or her to pay for the materials and do it yourself.

If the house or apartment fails, you and/or your PHA may try to convince the owner to make the repairs so it will pass. The likelihood of the owner making the repairs may depend on how serious or costly they are.

If it fails, all repairs must be made, and the house or apartment must be re-inspected before any lease is signed. If the owner cannot or will not repair the house or apartment, even if the repairs are minor, you must look for another home. Make sure you understand why the house or apartment failed, so that you will be more successful in your next search.
