

Dear Head of Mathematics,

RE: Maths author talk

My book “Mathematical Adventures!” was published in 2020, and my second book “Peculiar Deaths of Famous Mathematicians” is coming out this June. They are both fully illustrated non-fiction books published by prestigious maths specialist publisher Tarquin Group.

I have been teaching mathematics for more than 15 years and employ story telling in my teaching. I would like to offer a talk on topics from my books “Mathematical Adventures!” (more suitable for 10+) or “Peculiar Deaths of Famous Mathematicians” (for students 14+).

The duration would be one period, or up to one hour, with the purchase of one class set (at least 30 books) of either of the two books, and travel expenses from West Sussex.

I am available during the week 10-14th July 2023.

With best wishes for the remainder of the school year,

Ioanna Georgiou
