SUBJECT: Stevens Amendment Policy

REFERENCES.

- Public Law 117-328, Section 505 of Division H,

BACKGROUND.

The Stevens Amendment is a federal law found in H.R. 6157 that requires funding information to be included on all projects or programs using federal funds. It is intended to provide transparency for taxpayers and ensure federally funded research and work are properly credited.

POLICY.

All Board materials relating to funding must include a funding statement on all materials that communicate information regarding programs funded in whole or in part with federal funds including award announcements, requests for proposals, bid invitations, presentations, website content, press releases, and marketing materials.

Compliance is required for activities that directly support and further the goals of the federal award or grant. It is not required for activities covered through indirect costs. For materials funded by multi-year federal grants or awards, only the funding for the current program year must be disclosed. When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with federal money, the Board shall clearly state:

1. the percentage of the total costs of the program or project which will be financed with federal money;
2. the dollar amount of federal funds for the project or program; and
3. percentage and dollar amount of the total costs of the project or program that will be financed by non-governmental sources.
4. Stevens Amendment

The Stevens Amendment is an appropriations provision that requires U.S. Department of Labor and U.S. Department of Health and Human Services grant recipients to acknowledge federal funding when publicly communicating any projects or programs. This requirement to reveal the costs financed with federal funds promotes transparency and accountability and ensures any federally funded research and work are properly credited.
