

Prophy-Mate Neo

SPARKLING RESULTS, EVERY TIME

The lustre of teeth can be reduced due to over-indulgence in red wine, coffee and other strong foods and drinks. Now, we at Sutton Park Dental Centre can offer our patients an immediate solution that will make your teeth look and feel fantastically fresh and clean. Air-polishing is a rapid and highly effective way to return to a brilliant smile, without using harsh tooth whitening products.

NSK's Prophy-Mate Neo dental air polisher unit and FLASH Pearl are a perfect combination, providing the ultimate air-polishing experience.

FLASH Pearl, a cleaning powder for Prophy-Mate Neo, is a 'spherical particulate' powder, designed to roll smoothly over tooth surfaces and penetrate all corners for rapid cleaning. The spherical shape of the powder granules lessens the likelihood of damage to teeth and soft tissue while removing stains and plaque quickly and safely.

SPHERICAL GRANULES REMOVE RESIDUE FROM EVERY CORNER

FLASH Pearl granules are small and spherically shaped compared to particles of sodium bicarbonate powder. This means more contact and better access to clean all target areas effectively. A wider working angle also provides greater treatment safety.

To enquire about air-polishing, contact our Patient Care Team, on 01562 744840, and add it to your next Hygiene appointment.

You won't be disappointed.
