18/8 stainless steel (304 material)

In 18/8 stainless steel,the alloy consists of 18% chromium and 10% nickel. This combination not only provides excellent resistance to corrosion,preventing rust and stains,but also enhances durability and imparts a high mirror polished finish,resulting in high-quality cutlery.

18/0 stainless steel (430 material)

In contrast, 18/0 stainless steel contains 18% chromium without the addition of nickel. While still offering good quality and design,this type of steel may not possess the same level of durability and shine as 18/8 stainless steel. Cutlery made from 18/0 stainless steel is often chosen for applications where cost-effectiveness is a priority.

420 Hardened Knife Steel :

For our knives,we are using 420 hardened knife steel. This type of steel is known for its strength and ability to maintain a sharp edge.It ensures that our knives are not only durable but also reliable for precise cutting.

Stoneware index

Poreclain index

Stoneware reactive grey glaze plate & bowl
