Oregon Medical Education Foundation

**Join us on Friday, December 2 as we celebrate a brighter
Future of Medicine.**

OMEF was founded in 1961 and is the only healthcare nonprofit providing wraparound, whole-person support to help Oregon's MD, DO & PA students not just survive, but thrive during their medical education.

Our scholarships are a literal lifeline to students in need, and through our community grants we partner with community leaders to give students every chance to expand their educational horizons and encourage prospective students from diverse backgrounds to pursue a career in healthcare.

This winter we will bring together 250 community leaders, providers, students, family and friends at the new Ironlight venue in Lake Oswego to meet this year's Future of Medicine Leadership Scholarship recipients and celebrate those who go above and beyond to make Oregon the best place to live, work, play and practice medicine.

Friday, December 2, 2022

Ironlight | 525 Third St, Lake Oswego
6pm Welcome | 7pm Dinner | 8pm Awards
9pm After party

Will graduate
already experiencing
feelings of burnout

Champions for a bright future of medicine

OMEF has helped hundreds of students achieve their dreams, awarding over \$550,000 in urgently needed financial relief to help offset some of the crushing debt burden most students face when pursuing a medical education.

Our flagship program, the Future of Medicine **Leadership Scholarship**, provides the most support to students who demonstrate exceptional leadership qualities.

Our vision is to also create a statewide **Mentorship** program that would bring tremendous benefit not only to students but also to their mentors. With burnout on the rise and mental health at the forefront of many conversations, this professional resources is more important than ever.

You will hear from Leadership Scholars like Carolina about what it's like to be a student today and be inspired by her generation's vision for the future.

Visit www.theomef.org/2021-Scholars to meet all seven of last year's recipients.

Carolina holds a Master's degree in Public Health and is a Physician Assistant student at OHSU. She grew up in a rural community in Southern Oregon and upon graduation plans to return to practice medicine and help solve healthcare inequities such as lack of access, limited treatment options and affordability of insurance.

She sees the lack of communication between providers and patients as a significant hurdle and a strong determinant of health and is committed to building bridges as a bilingual and bicultural provider.
