

BUSINESS HEALTHCHECK

Our Health Check uncovers what is holding your company back and then provides prioritized actions to propel it forward for optimum profitability and performance.

A DETAILED ASSESSMENT OF YOUR COMPANY'S HEALTH AND ITS FUTURE OUTLOOK.

THE TOUGH QUESTIONS

Are you happy with the performance of your company? Are you concerned about the future? Do you know how to improve your current situation? Are you too close to your organization's operation to recognize its strengths & weaknesses? Is your company providing both you and your employees with the resources and challenges to allow you and them to grow to their full potential? Do you wish for an improvement in your company's reputation? Do you know what needs to be transformed and what are the priorities?

No matter where in its life cycle your company happens to be, whether at the start of the growth curve or close to winding down, you will be glad that you utilized the insight and experience of an expert advisor like Northward Partners.

Upon engaging Northward Partners to improve your company's performance we begin with our Discovery Process to fully understand the challenges that you face, determine your goals and to lay the groundwork to get you from point A to point B in the shortest amount of time.

The Discovery Process will require you to be reflective regarding your past and current performance, your capabilities and weaknesses, your future goals, and the challenges that you face to get there.

Our proven "Road-map to Value Creation" will assist you in accomplishing the agreed-upon objectives every step of the way.

WHERE NORTHWARD PARTNERS CAN HELP

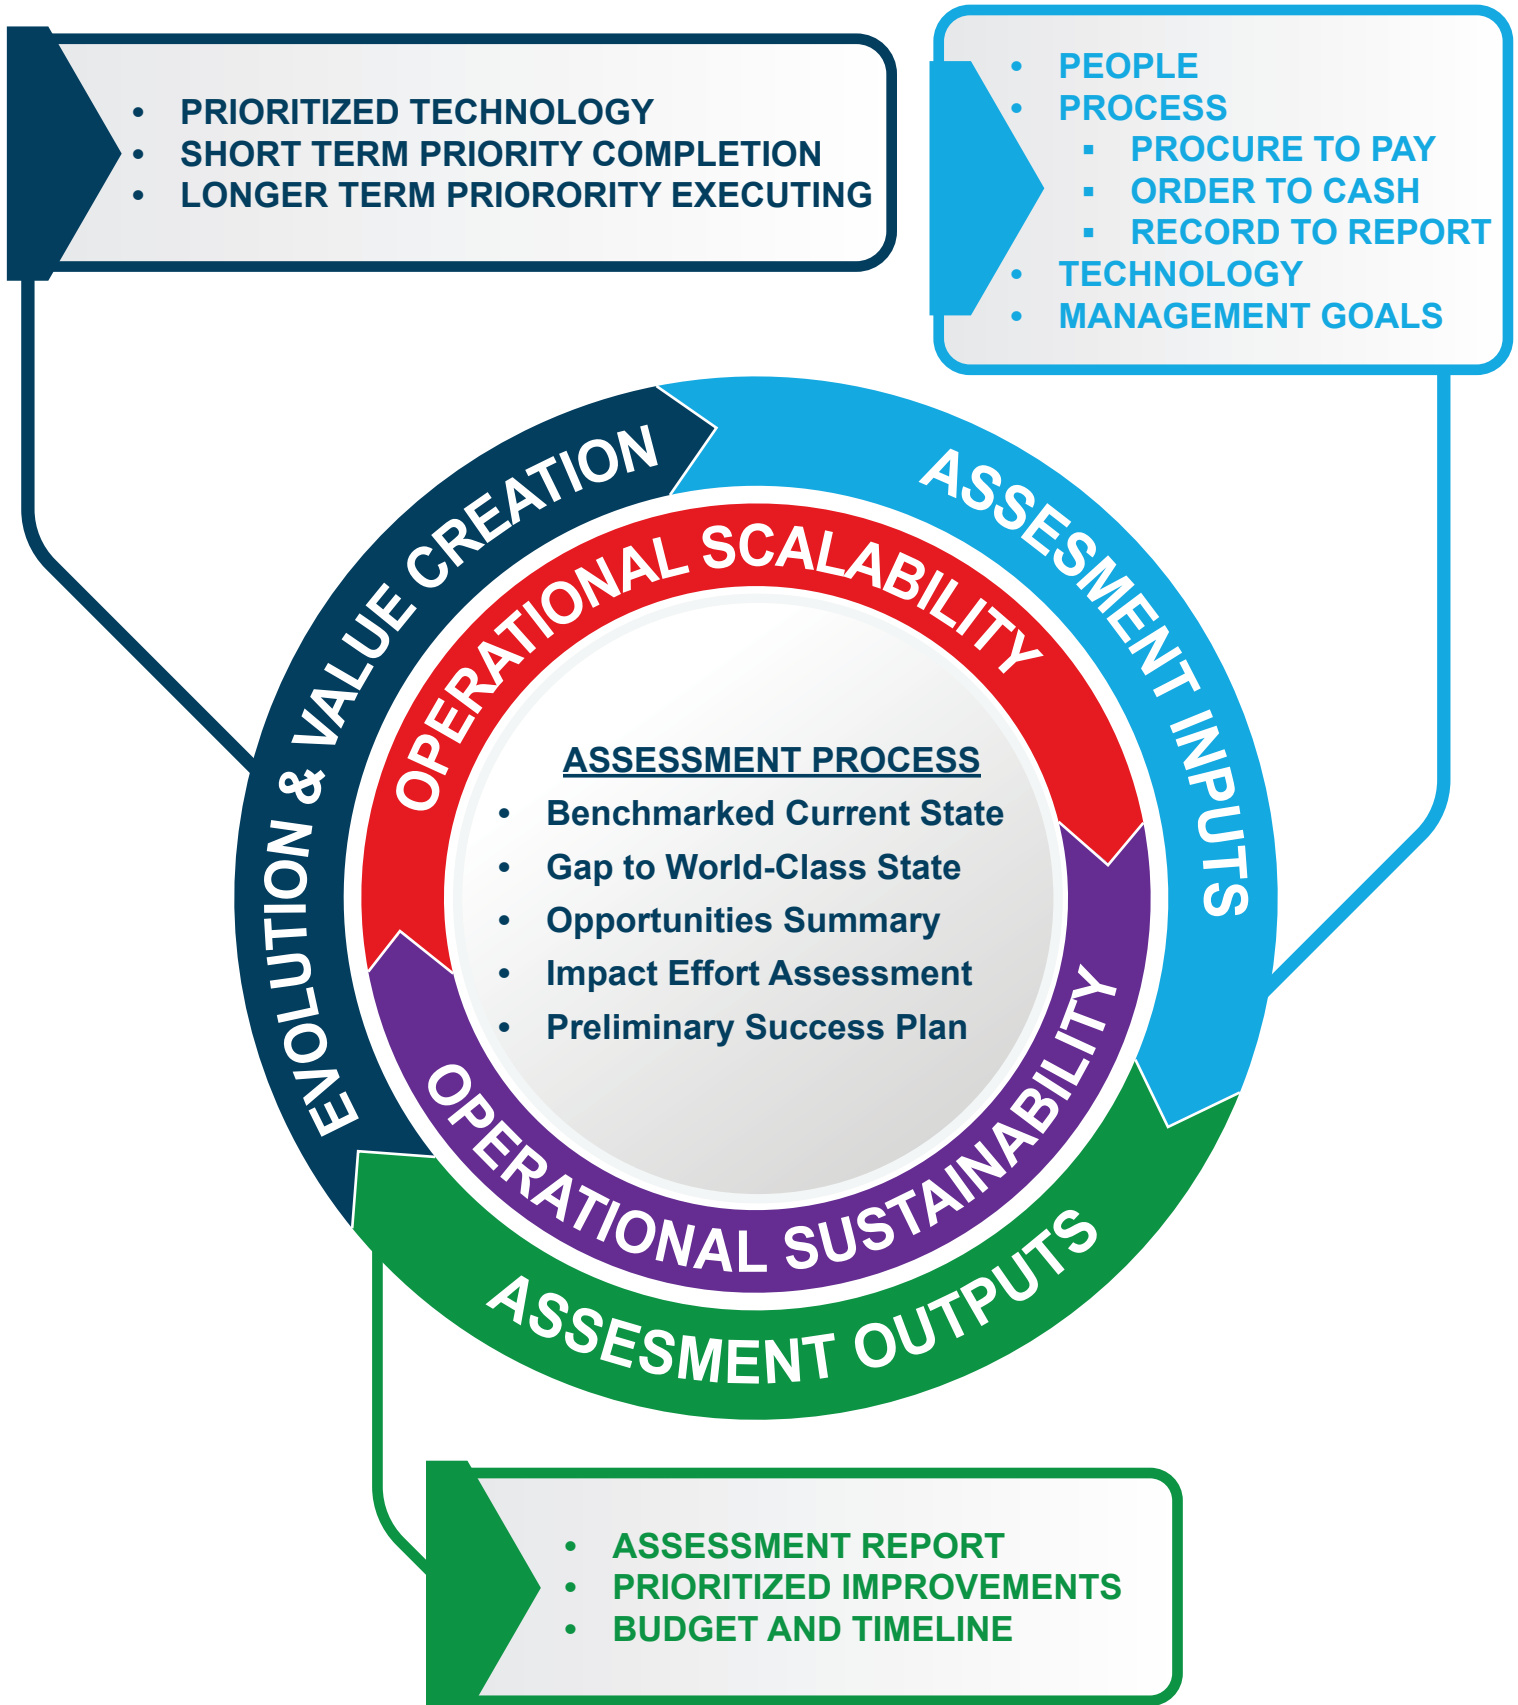

Following the initial Discovery sessions, Northward utilizes a matrixed framework for benchmarking against "world-class" standards for all key workstreams (e.g.: Order to Cash, Procure to Pay, and Record to Report) while considering the approach to, and impact on, Strategy, People, Process, and Technology to transform the organization to realize its goals and potential.

The ultimate purpose of the Business Health Check is to identify opportunities for improvement by providing experienced consultants to map, assess and prioritize meaningful recommendations within a rapid timeframe. The objective is to provide short-range and long-range recommendations to streamline, automate and provide management timely and meaningful insights into the business.
