## Full-Stack Software Engineer

**Summary**: Innovative full-stack engineer motivated to learn more about new technologies and ways to inspire others to contribute to highly successful and impactful applications that bring people together

## SKILLS

**Backend**: Ruby | Ruby on Rails | RSpec | ActiveRecord | PostgreSQL | Python | GraphQL | CORS

**Frontend**: ReactJs | JavaScript | Cypress | CSS | HTML5

**Concepts**: MVC | SOAP | OOP | TDD | REST APIs | Mock Testing-VCR

**Others**: Git | GitHub | CI/CD | Heroku | Postman | BitBucket | SourceTree | Learning C# and AWS

## EXPERIENCE

**Front-End Engineer Internship**  *MedDefend | Remote*  Jan 2023 - April 2023
- Developed and designed the front end of a medical application
- Utilized ReactJS, JavaScript, BitBucket, and Sourcetree on a microservice application
- Meddefend was created to help you connect with doctors quickly over the phone and get answers to your questions easily

**Backend Engineer**  *Turing School of Software and Design | Denver, CO*  Nov 2021 - Sep 2022
- Developed 15+ web apps in Back-End engineering capacity at the only ACCET program in the US
- Utilized Ruby, Ruby on Rails, RSpec, PostgreSQL, ActiveRecord, and Github both on independently run and group projects

## PROJECTS

**TerraNotes**  [Back-End Repo](#) | [Front-End Repo](#)

Solo project
- A scalable microservice notes application where a user can login to an account and see their saved sticky notes
- Front-end functionality includes creating sticky notes, dragging the sticky notes around, editing notes, or deleting notes
- The back-end of the application includes authentication, OOP best practices, and extensive error handling
- A users sticky notes and their positions can be saved to the database so when logging back everything stays the same

Tech: *Ruby | Ruby on Rails | JavaScript | ReactJS | JSON | REST APIs | Postman | CSS/HTML | Github*

**Birds of a Feather**  [Front-end Repo](#)

3-week team project - Team of 7
- Users can create and host events for other users to rsvp to
- Did daily stand ups to go over blockers and objectives for the day
- Contributed to the backend of the microservice application, making external API calls for the front-end to consume, and adding graphql mutations using CRUD functionality

Tech: *Ruby | Ruby on Rails | RSpec | APIs | CircleCI | Heroku | GraphQL | Postman | CI/CD*

## EDUCATION

**Certification in Back-End Software Engineering**  *Turing School of Software & Design  Nov 2021 - Sep 2022*
- Completed the accredited backend program
- Fast-paced learning environment, learning agile workflow and test-driven development
