Looking for a seamless solution for Time Tracking and Certified Payroll Reporting for your construction company?

Take advantage of the QuickBooks Time and Points North integrations for ADP Workforce Now® and RUN Powered by ADP® and generate certified payroll reports for federal, state and municipal formats with data collected straight from your employees.
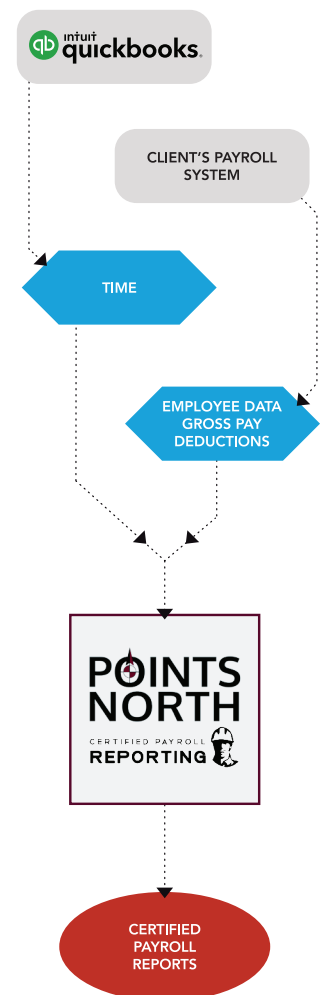

Import time tracking data from QuickBooks Time into Points North Certified Payroll Reporting by following these simple steps:

1. Client tracks time using QuickBooks Time to capture employee hours by day, by job, and by work classification

2. Client sends their QuickBooks Time data into Points North each pay period with the click of a button using an API integration

3. Client has their employee data in Points North via an API with ADP®; they also have their project data and work classification data set up in Points North

4. Client has their prevailing wage rates/fringe rates set up in Points North

5. Client processes payroll

6. Points North pulls completed, finalized payroll data over from ADP via API

7. Client uses Points North to generate their certified payroll reports (federal format, state formats, municipal formats, etc.) for each of their projects

ADP Marketplace Partner — PLATINUM — ADP Always Designing for People®

Points North Certified Payroll Reporting is the solution of choice for any contractor or construction company working with prevailing wages. Our full-service compliance solution offers:
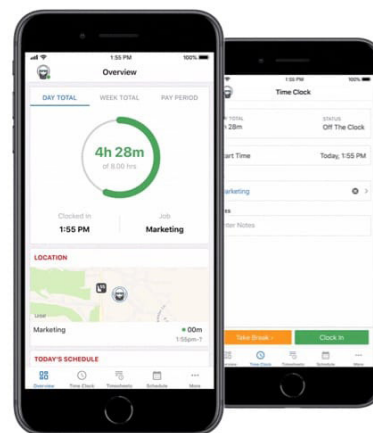

- √ Payroll Integration - Our system works with your payroll provider to provide a streamlined reporting process

- √ All Report Formats – Be confident that you are using the most current version of all federal, state and municipal report formats

- √ Rate Management - Store and manage prevailing wage rates at any level necessary based on your projects

- √ Prevailing Wage Calculations - Store and manage fringe data at an employee, project, or work classification level

- √ Generate certified payroll reports – and email them where they need to go – directly from the Points North platform

QuickBooks Time's automated time tracking software is used by thousands of construction companies to track and manage employee time for payroll, invoicing, and scheduling, resulting in more accurate payroll, higher profits and increased visibility.

Tracking time on the job site with the QuickBooks Time helps:

- √ Increase worker accountability (see a "who is working window" with location now and breadcrumb trail)

- √ Reduce labor costs associated with overtime (see who is approaching OT in real time)

- √ Ensure the safety of your crew

- √ Get accurate time data so you can estimate labor costs for projects with greater accuracy
