

Corn - 8 Bushels added with HYPRgERM and AncorN

This north central Kansas grower added 8 bushels/acre simply by adding HYPRgERM and AncorN. The only difference in his fertility was treating his seed with HYPRgERM and applying .5 gal/acre AncorN in-furrow at planting. HYPRgERM cost \$.75 cents/acre to treat the seeds and AncorN cost \$6/acre. **His total investment for HYPRgERM and AncorN was less than \$7/acre and his net profit increased by \$35/acre!** Would you like to trade \$7 for \$35? With HYPRgERM and AncorN, it is possible!
