Toileting

A

Toilet Safety Frame (also known as Versa Frame)

Available with legs under the seat (figure B), to the floor (figure A) or stand alone (left)

B

C

Toilet Seat Riser (figure C)

Installs between your toilet and existing toilet seat to add additional height. A great choice if you want to keep using your original toilet seat.

D

Raised Toilet Seat (figure D)

Clamps on to your existing toilet replacing the original seat to provide additional height. Available with or without armrests. Standard or Elongated options.

E

Universal Raised Toilet Seat (E)

If you are not sure of your needs, the universal raised toilet seat is height adjustable and works on both standard and elongated toilets!

Helpful Tips

Raised Toilet Seats are available in 2", 4" or 6" heights. Make sure you know what height you require and if your toilet is regular or elongated!

Toileting

A

B

C

D

E

Commodes

Stationary or Wheeled

Regular Arms (A) or
Drop Arm (B) for transferring

Standard or
Heavy Duty/Bariatric (C)

Shower Commodes

Multi Use Commodes for over the toilet, at the bedside and in the shower.

Options:
Standard (D) or Tilting (E)
Add Soft Padded Seat
Standard or Heavy Duty (Bariatric)

Contact your Comfort Mobility Representative for assistance choosing the right shower commode for you!

Also Available

- Absorbent Pads or powder for bucket to reduce odour
- Splash Guard for over toilet use
- Commode liners
- Portable Male and Female Urinals
- Incontinence Supplies

Bathing

A

Extra Long Shower Head with Shut Off Valve (figure A)

If you are often seated in the shower or in your tub using a shower head, this is the tool for you!

B

Clamp On Tub Rail (figure B)

Add a handle to the side of your tub for balance and mild support entering and exiting your bath tub. If you require more support than just balance, it is recommended that a Super Pile with horizontal bar is used.

C

Non-Skid Bath Mat or treads (figure C)

Add grip to your shower or bath tub with a non-skid Bath Mat or tread stickers.

D

Grab Bars or Super Pole (figure D)

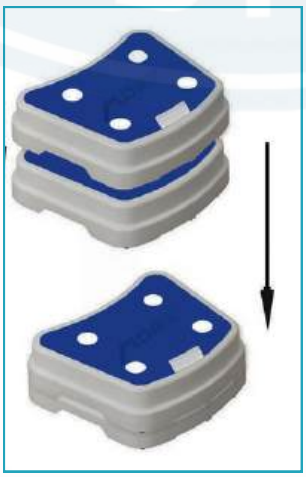

The pressure mounted Super Pole is the ideal temporary solution in rental properties or if you don't want permanent fixtures. Our professional installers can recommend location and install either for you for total peace of mind.

Bath Step (figure E)

While these steps can be used anywhere, they are ideal for a bathroom setting. Stackable to create the ideal height for you.

E

Bath Lift and Stackable Steps (figure E)

Want to take a bath but have trouble getting in and out? A bath lift a seat that sits inside your tub and raises up and down to raise and lower you in the tub. The transfer flaps make the transition out of the tub a breeze. Steps outside the tub can assist you stepping up into the tub.

Bathroom Safety

Row 1: Bath Chair, Heavy Duty Bath Chair, Bath Chair with Arms **Row 2:** Bath Bench, Swivel Bath Chair with Arms, Blown Plastic Bath Chair **Row 3:** Swivel Bath Stool, Transfer Bench, Padded Transfer Bench **Row 4**: 2 Transfer Benches with Curtain Guards, Bath Board

Sitting Pretty™
COLLECTION

3-Position Lift Chair with Basic Pendant

Muskoka has Power Headrest & Lumbar

VivaLIFT!®
POWER RECLINER COLLECTION

Dual Motor Infinite Position Lift Chairs include power headrest, power lumbar, head and foot move independently. Some models have heat and massage.

Measuring for a Lift Chair

All Lift Chairs are as varied in size and shape as the people who enjoy them. Taking the following detailed measurements prior to a purchase will ensure a proper fit and deliver maximum satisfaction.

The Importance of Sizing

Comfort

Finding the perfect fit for your new lift chair will provide the most comfortable option available. These are not a one-size fits all.

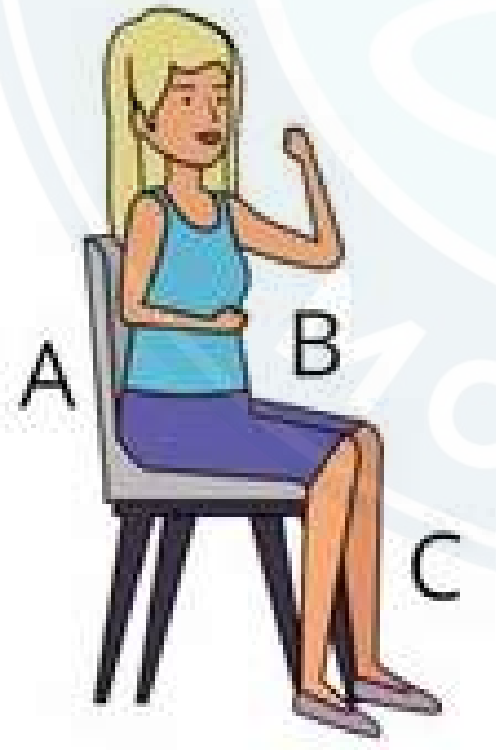

Safety

Your safety is our top priority! If a lift chair is too big or too small, it can become a safety hazard when transferring in and out of the chair. We want to make sure you find the perfect fit for safe transfers every time you enter and exit your chair.

Longevity

Did you know that if a lift chair is too big or too small it can cause mechanical issues over time? We want to help you find the perfect fit to encourage comfort and not headaches due to mechanical breakdown.

All Lift Chairs sold are warrantied by the manufacturer against defects.
Please Note: No warranty covers labour.

A – Seat to Top of Back _____ inches
Measure the vertical distance from the base of a seat to the top of the user's head while seated.

B – Seat Depth _____ inches
Measure the horizontal distance from the back of the seat to the back of the user's knee while seated.

C – Floor to Top of Seat _____ inches
Measure the vertical distance from the floor to the top of the back of the user's knee while seated.

D – Width Between Arms _____ inches
Measure the horizontal distance between the hips while seated (add 2 inches for wiggle room).

E - Leg Length _____ inches
Measuring leg length can help determine where the heel will land on your legrest.

User Height: ____ft _____ inches

User Weight: _____ lbs

Homecare beds

Medacure by Human Care

36" W x 80" L

Homecare beds

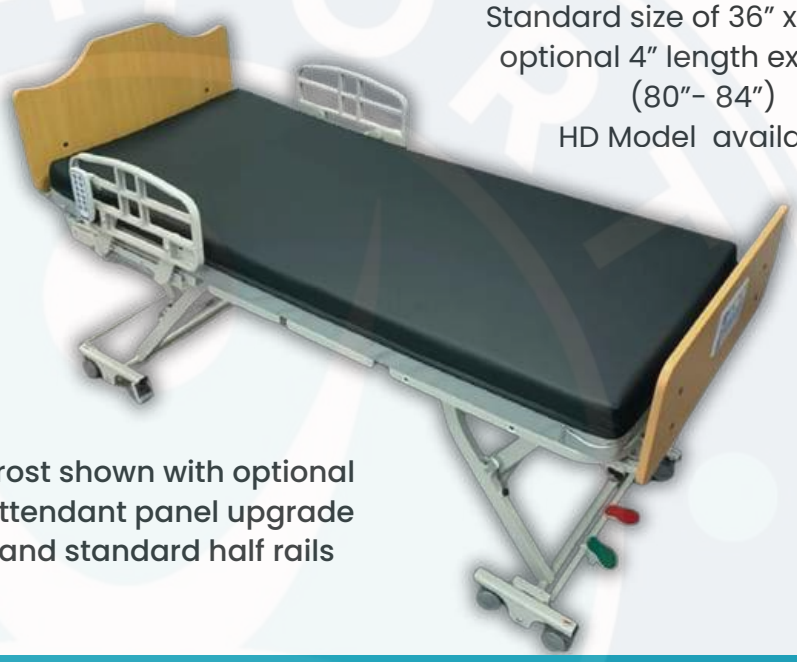

Trost & Trost Lite Bed by Permobil

The Tröst Bed from Permobil is an electric, adjustable bed ideal for long-term care patients and their care providers. It offers a low height of 6.75" and a high height of 30" to meet all your caregiving and client needs. Tröst Bed has a 12-button hand pendant and optional footboard attendant controls, so customized comfort is an easy adjustment.

Standard size of 36" x 80" with optional 4" length extension (80"- 84")
HD Model available

Trost shown with optional attendant panel upgrade and standard half rails

Trost HD Bed by Permobil

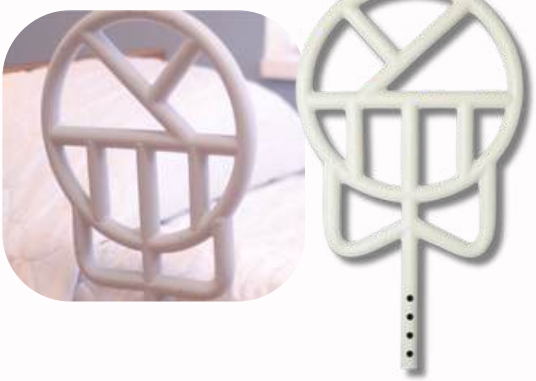

The Tröst HD Bed is an electric, adjustable bed perfect for long-term care. It features a deck expansion system for width adjustments (36", 42", 48"), optional length extensions (80"-84"), height adjustments (7"-30"), and a 750 lb weight capacity. The 12-button hand pendant and optional footboard controls ensure comfort. Standard Trendelenburg and Reverse Trendelenburg features allow a 15-30 degree incline. Available with natural or wine-colored head/footboards (sold separately or as a package).

Halo Safety Wing

The Halo Wing helps eliminate the four most dangerous entrapment zones creating a safe bed system environment. It can be used as a side rail replacement, for transferring or movement in bed, and preventing bed rollouts and falls. It exceeds the compressibility of mattress and 2 1/3" gap space along with the 60" exit point for Zones 2, 3, and 4. Can be used on Tröst beds and comes with a lifetime warranty.

Luxury Homecare beds

Resten Hi Low HomeCare Bed

Mattresses

Allay

The **Allay** reactive foam replacement surface with patented Shear Reduction Technology (SRT) is an innovative solution designed to address shearing forces present during client movement in bed or when changing the position of the bed frame, at the same time ensuring proper pressure redistribution. The Allay is a cost effective choice for clients at risk of experiencing skin breakdown. The side bolsters complete with accordion cuts provide an excellent transfer edge.
The surface is designed to absorb forces that damage skin, thereby reducing the risk for skin breakdown. A third party clinical trial was completed by Durham College Department of Nursing and Department of Engineering to validate SRT. The trial provided non-biased support for the efficacy and use in populations where shear forces can damage vulnerable skin.

Align

The **Align** reactive foam replacement surface with patented Shear Reduction Technology (SRT) is an innovative solution designed to address shearing forces present during client movement in bed or when changing the position of the bed frame, at the same time ensuring proper pressure redistribution. The Align is a cost effective choice for clients at risk of experiencing skin breakdown. The side bolsters complete with accordion cuts provide an excellent transfer edge.
The surface is designed to absorb forces that damage skin, thereby reducing the risk for skin breakdown. A third party clinical trial was completed by Durham College Department of Nursing and Department of Engineering to validate SRT. The trial provided non-biased support for the efficacy and use in populations where shear forces can damage vulnerable skin.

Domus 1

2.5" Economical Pressure Relief Bubble Pad System

Domus 1 is ideal for prevention and treatment of patients at low risk of pressure ulcers. This lightweight and compact alternating pressure pad is composed of 2.5" tall bubble cells, and it is used as an alternative for heavier products such as gel overlay mattresses. The system is great for short term usage and easy to install. With a pressure adjustable pump and extension flaps on top and bottom sides of the bubble pad to prevent to pad from sliding. Domus 1 is designed to be a great transition mattress for homecare.

Weight capacity 500 lbs

Specialty Mattresses

Atlas Hybrid

Ideal if you're not quite ready for an alternating pressure mattress but you may in the future

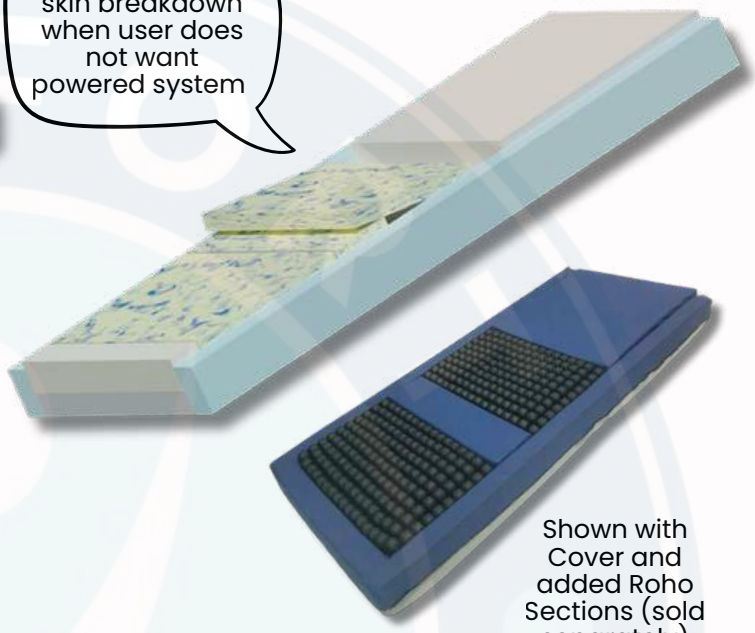

The **Atlas** is a non-powered, self-adjusting mattress that utilizes equalization technology to provide maximum pressure redistribution for the prevention and treatment of pressure injuries.
Starting at the head, the convoluted high resiliency foam improves client upper body mobility. Next is a cool climate visco gel swirl foam top layer at the torso and middle section for immersion and heat dissipation, followed by a 5-degree sloped foot section made with Serene™ foam to help transfer excess pressure from the heels. Beneath the top layer, interconnected chambers provide pressure redistribution, and there are 4" wide firm borders to ensure a solid transfer edge.

The Atlas is also convertible to a powered air surface that uses Alternating Pressure Therapy (APT) with the addition of the digital pump that is sold separately.

For surfaces sized 48" - 60", the Domus 4 pump is required to provide the APT.
When the pump is not being used, a valve closure kit is recommended and can be used to adjust the softness/firmness.
A manual air pump can also be used to set the firmness of the chambers. Both the closure kit and manual pump come included with the Atlas.

Adapt2

Ideal for high risk skin breakdown when user does not want powered system

Shown with Cover and added Roho Sections (sold separately)

The **Adapt2** interchangeable foam replacement surface with patented Shear Reduction Technology (SRT) is an innovative solution designed to address shearing forces present during user movement in bed or when changing the position of the bed frame, at the same time ensuring proper pressure redistribution.

The Adapt2 is our modifiable surface for the user at high risk of experiencing skin breakdown and may require the ROHO mattress sections.

The side bolsters complete with accordion cuts provide an excellent transfer edge.
The surface is designed to absorb forces that damage skin, thereby reducing the risk for skin breakdown. A third party clinical trial was completed by Durham College Department of Nursing and Department of Engineering to validate SRT. The trial provided non-biased support for the efficacy and use in populations where shear forces can damage vulnerable skin.

Specialty Mattresses

Neptune & Neptune Edge

The **Neptune** is an advanced pressure redistribution system featuring low air loss with alternating pressure, CLP (static mode). This intelligent design simplifies setup for caregivers, while helping ensure optimal patient comfort. The system's compressor operates at a near-silent level, while supporting effective pressure management and patient support. Neptune incorporates 20, 8-inch cell-on-cell air bladders, providing continued support even during a power interruption. Designed for ease of use and exceptional clinical performance, Neptune helps deliver optimal patient care in a wide range of healthcare settings and sizes. It also features adjustable alternating cycle times and an upright mode for fowler position.

Features at a glance

- Designed for patients at a medium to high risk of pressure injuries
- Improved airflow for enhanced cooling and moisture management
- Quilted, removable cover enhances comfort and facilitates patient movement
- Available in 36", 42", and 48" widths to accommodate a range of patient populations
- Weight capacities up to 450 lbs (36"), 550 lbs (42"), and 650 lbs (48")
- Cell-on-cell air bladder design provides continued patient support during power interruptions

The **Neptune Edge** combines all the proven features of the Neptune system with enhanced safety and support technologies. A firm 3-inch foam perimeter surrounds all four sides of the mattress, helping keep patients centered on the surface while reducing roll-out risk. The reinforced edge also provides a stable transfer surface, assisting patients and caregivers during ingress and egress. Featuring 5-inch air cells and a supportive 3-inch foam base, the Neptune Edge delivers outstanding pressure redistribution while helping prevent bottoming out during power interruptions. Designed to optimize skin protection, patient comfort and caregiver confidence, Neptune Edge offers an ideal solution for patients requiring enhanced safety and pressure management. It also features adjustable alternating cycle times and an upright mode for fowler position.

Features at a glance

- Designed for patients at medium to high risk of pressure injuries
- Firm 3" foam perimeter helps reduce roll-out risk and provides a secure transfer edge
- 3" foam base helps prevent bottoming out during power interruptions
- Improved airflow for enhanced cooling and moisture management
- Quilted, removable cover promotes comfort and ease of patient movement
- Available in 36", 42", and 48" widths
- Weight capacities up to 650 lb

TRANQUILITY
PREMIUM PROTECTION

Incontinence Supplies

Tranquility Male Guards are a disposable incontinence pad that is designed specifically to help men manage light to moderate bladder leakage. The Tranquility Male Guards provide Maximum Leakage Defense by absorbing up to 9.5 oz (280 ml) of fluid

Tranquility Premium OverNight Disposable Underwear overnight incontinence underwear that can hold up to 34 oz of fluid – that's more than a quart of liquid! This extra absorbency helps you to stay dry and comfortable so you can sleep all night long.

Tranquility Premium DayTime Underwear is a pull-up style incontinence underwear that can absorb up to 25 oz of fluid. The added absorbency provides all-day protection for managing moderate to heavy incontinence.

Tranquility TopLiner Booster Pads are absorbent pads that are inserted into incontinence garments to extend their wear time. These pads are designed to absorb up to 14.2 oz (420 ml) of liquid before allowing additional fluid to pass through to the primary garment.

TopLiner Booster Contour Pads have a wider design to help contain bowel incontinence, and their soft texture makes cleanups easier. They are also simple to change and dispose. Because of its full-fit design, this item works best with tape-tab briefs.

Tranquility ATN (All-Through-the-Night) Briefs are disposable incontinence briefs for adults and teens that keep you dry "All-Through-the-Night." A full-fit, poly-backed brief with expanded surface area providing longer wear time by absorbing multiple voids.

Tranquility Cleansing Wipes Ideal for anyone with sensitive skin who needs a gentle way to clean up after incontinence episodes, daily care or during wound treatment. Wipes are 9" x 13", soft and cloth like, allowing for a quick clean up and thorough cleansing of the entire body. Infused with Aloe Vera, Chamomile and Vitamin E to soothe and moisturize the skin.

Tranquility Heavy-Duty Underpads 30" x 36" feature a durable, clothlike backsheet that provides better surface grip and helps to avoid slips and tears as you move. Superabsorbent core features Powersorb, a powerful absorbent layer that quickly wicks and locks away up to 34 oz of fluid, helping to maintain skin integrity and reduce odor.

Tranquility Adult Liners Disposable incontinence pads that have an adhesive strip on the back, to be worn inside regular underwear for a discreet appearance, helping to maintain a normal active lifestyle and providing peace of mind to the wearer. The patented peach core has excellent absorption and helps maintain skin dryness and odor reduction.

Compression Stockings

Key facts about Compression Therapy

Compression therapy plays a central role in the treatment of venous edema and lymphatic disorders. It serves two main purposes: to reduce swelling caused by fluid filtration in the tissues and to reduce venous reflux and venous hypertension. The term "compression" refers to a mechanical pressure exerted from the outside onto skin and tissue.

Direct Billing to Green Shield Available

Certified Compression Stocking Fitters on staff.
Call us today for your free fitting!

How can compression treatment help me with my venous disease?

Compression therapy for legs means wearing special medical compression stockings that come in different lengths and styles, to suit a variety of venous diseases and individual needs. So, why wear compression stockings? Because they help to normalize the blood flow, to close venous valves better again and ease typical problems such as heavy legs.

For this reason, compression stockings may also help to reduce heavy, swollen legs during pregnancy or long days of sitting or standing at work. Compression therapy is also a good solution for people who regularly take long flights or journeys: compression stockings for travel are specially designed for this purpose.

JOBST BAUERFEIND SIGVARIS

Medical compression for lymphedema

Compression solutions, such as those offered by JOBST, are also an important component in the management of lymphedema. Lymphedema is a disorder of the lymphatic system, whereby lymph fluid accumulates in the tissue space and is unable to drain properly due to physical damage to or abnormality of the lymphatic system. This causes swelling and discomfort in the affected limb. Compression treatment exerts pressure from the outside onto the tissue, increases the interstitial pressure, and supports the fluid transport and recovery in the lymphatic system. Thereby fluid accumulation is counteracted, which helps to maintain the volume and shape of the affected body part of lymphedema patients..

Ask your doctor for more information about wearing compression stockings. They will be happy to provide detailed advice about the application possibilities of compression solutions and further benefits of compression therapy. Visit or call Comfort Mobility to fill your prescription!

Venous disorders are common, just like high blood pressure, heart disease or diabetes, and should be taken seriously.

With an overall width of 20.75” with 12.5” drive wheels, the Stretto is the best narrow wheelchair for children, teenagers and small adults to use in the home.

MADE IN CANADA

Maple Leaf WHEELCHAIR

MLT

The MLT is a geriatric tilt and recline steel frame manual wheelchair. Its frame includes tension straps to provide extended comfort for it’s user. It also offers the choice of 4 casters or 2 large real wheels.

SUPERTILT

The SuperTilt is Maple Leaf Wheelchair’s flagship product. It offers up to 450 of tilt with the smoothest, most consistent tilting mechanism on the market. With it’s steel frame construction it is sure to stand up over time and can offer weight capacities up to 500 lbs. Pair this chair with any of our seating products and it will provide maximum comfort as well as extended pressure relief for the user.

Mobility Equipment Purchase Guide

Getting Started

Contact Comfort Mobility!

Call Comfort Mobility to get into contact with your Mobility Consultant or let your therapist know which company you choose to deal with for your equipment needs. Your therapist will call one of our Mobility Consultants to schedule an Assessment to fit you for your mobility equipment based on your current and future needs.

Equipment Selection

Work together with your therapist and vendor to find the right equipment for you. With a Registered Nurse with over 30 years of experience in Home Health Care on staff, Comfort Mobility can provide medical and equipment expertise required to ensure that your clinical requirements are matched with quality and reliable products. We are here to maximize your health care potential with top-of-the-line equipment.

Funding

There are funding agents available for most mobility equipment. Comfort Mobility is an ADP Authorized Vendor. We deal directly with the Assistive Devices Program, Green Shield, Blue Cross Veteran's Affairs, Rotary, WSIB, and more.

If you are unsure of what funding is available to you, speak with your Mobility Consultant about your options. Let us help you make this process stress free.

Order, Set Up and Delivery

We pride ourselves on continuity of care from start to finish. Your Mobility Consultant will be with you every step of the way.

Once your equipment has been selected and ordered, your Mobility Consultant will personally deliver and set up your equipment and make adjustments where required. We will answer any questions you have regarding everyday care and maintenance of your new equipment and provide you with all the necessary paperwork required for the life of your product.

Custom Equipment takes time to build, and we understand that! That's why Comfort Mobility provides complimentary loaner equipment when available until your order arrives. If we are awaiting funding approval and the client portion has not been paid, Comfort Mobility has a wide range of affordable rental equipment available to you at a monthly rate.

Ontario

Assistive Devices Program (ADP)

Who Qualifies?

To qualify, you must:

Be an Ontario Resident

Have a valid Ontario Health Card

Have a disability requiring a mobility aid for 6 months or longer

ADP does not consider your income

Who Does Not Qualify?

You do not qualify, if you:

Already qualify for or are receiving financial support from the Workplace Safety and Insurance Board for the same mobility aid

Are a Group "A" veteran and already qualify for or are receiving financial support from Veterans Affairs Canada for the same mobility aid

Types of Mobility Aids Covered

manual wheelchairs, power wheelchairs and power scooters
power add-ons (devices added to a manual wheelchair if you don't need a power wheelchair)
positioning devices (e.g. cushions, back and head supports, power tilt and recline)
forearm-crutches
wheeled walkers for adults
pediatric walkers, standers and strollers

MINISTRY OF HEALTH AND LONG-TERM CARE

Ontario

ADP - Assistive Devices Program

Replacements

You can apply to replace your mobility aid if:
Your medical condition and/or functional ability has changed and your current mobility aid no longer meets your needs
Your body size has changed and your current mobility aid no longer fits
The mobility aid is worn out, no longer covered by warranty and cannot be repaired at a reasonable cost
ADP does not cover costs to replace a lost mobility aid or to repair aids damaged through misuse or neglect.
Equipment sold at Comfort Mobility Inc. has a limited warranty against manufacturer defects.

How Much Is Covered?

The Assistive Devices Program (ADP) will pay up to 75% of the ADP price for mobility aids. You must pay the remaining 25% of the cost. When ADP sets the ADP price for each mobility aid, they take into account: Manufacturer's and/or distributor's costs, Complexity of device. A business can't charge you more than the ADP price for the approved device.

Additional accessories, upgrades or items are not covered by the ADP (e.g. add-on accessories, batteries for power wheelchairs, etc.)

You Have A Choice!

You can choose the company you want for your mobility equipment and services whether you reside at home or in a long-term care facility.

Other mobility companies may offer similar equipment but service is where we excel!

Company/Vendor must be a Registered ADP Vendor

So How Do I get Started?

A formal Assessment by an Occupational Therapist or Physiotherapist registered as an ADP Authorizer is required. (Fee for Assessment to be paid directly to Therapist)
This will confirm that you need a mobility aid and determine which type best suits your needs.
ADP Application must be completed by you and your Therapist. We Comfort Mobility Inc. will then fill your prescription based on the Therapist's application.

Information Sourced from the Ontario ADP website

Rollators

neXus by Human Care

Type 2
(Indoor)

Unique material ultimate comfort seat
Ergonomic handgrips with optimal wrist positioning
Available in three colours – Black, Blue, and Red

Type 3
(Indoor/Outdoor)

The neXus 3 has innovated the way we think about mobility. With the first-ever cross-folding frame, it set the standard for future rollator design. The neXus can stand independently in the folded position even with the zippered bag on the rollator. The frame design allows the user ample space for an ergonomic walking gait, or if needed, a slightly folded frame to pass through narrow doorways in smaller areas. Because of this unique design, stability is not compromised, ensuring the neXus is the most reliable and safe rollator on the market.

STELLA Rollator

The light weight, easy to use STELLA rollator includes features to help people with reduced mobility in their daily activities. Built on an aluminum frame, the STELLA weighs only 14.75 lb* (6,7 kg) in its standard configuration. The oversized soft material backrest offers enhanced comfort and stability when seated.

*Weight does not include optional equipment.

standard features

- Reinforced seat
- Four 8” (205 mm) casters with smooth urethane tires
- Locking system when folded
- Stronger brake cables (25% thicker)
- Only 14.75 lb (6,7 kg)
- Oversized height adjustable backrest strap
- Height-adjustable handles with quick release system

Omnidirectional wheel for seamless navigation on diverse surfaces

Features:

Hands-free automatic folding and unfolding
Advanced dual suspension system for a smoother ride
Remote control via a user-friendly mobile app
Removable battery for convenient charging
Ergonomically designed backrest for maximum comfort

The **Golden Ally™ Pro** combines the strength of a traditional power wheelchair with foldable lightweight portability. Upgraded with the exclusive Omni-Directional Wheels with Self-Cleaning V-Groove and full suspension for superior outdoor performance. It's tight turning radius makes indoor navigation easy, while large rear drive wheels ensure a smooth outdoor ride. Enjoy comfortable seating and foot positions without the usual travel chair compromises. The all terrain wheels makes it the ultimate option for outdoor adventuring.

With a long-lasting battery, user-friendly interface, and Smart Control Mobile App, the Ally lets you navigate any environment effortlessly. Visit your phone's App Store for Remote Control. Move confidently with the Ally Pro – your perfect travel partner.

Patient Lifts

The Hoyer Advance® is compact, yet able to perform an outstanding range of transfers. Whether from the floor or onto a healthcare bed, the Advance copes with ease. The Advance's unique tapered leg design allows the lift to get even closer to the widest of obstacles. This is especially useful when encountering large chairs, bulky commodes, and wheelchairs. The tapered design also ensures that the resident feels safe and secure during the transfer.

Span America F450T standing transfer aid is designed to make transport quick and simple while encouraging weight bearing as well as maintenance of trunk and upper body strength. F450T stand-up patient lift is the ideal solution for patients with the ability to participate in their own transfers. F450T standing transfer aid has swing-away padded seat for secure, comfortable transport and the underbed clearance allows use with most low beds. The dual, contoured shin pads offers added stability and non-slip footplate provides stable base for transfer.

FLOOR LIFTS
STAND-AID LIFTS
SLINGS

Also Available:
Porch Lifts
Stair Lifts
Lift Chairs

Usage requirements: The F450T is designed to provide transfer assistance to patients with the necessary strength to Bear weight in the standing position, Pull themselves up into standing position, Lower themselves safely into the seated position For patients who meets above criteria, use of the F450T encourages activity and helps maintain strength.

Stair Lifts

How a Stair Lift Works

Stair lifts employ a battery-powered rack and pinion drive system, constantly charged by a nearby outlet at the top or bottom of the stairs. This design allows the stair lift to carry its rated load up and downstairs. Safety features, like the over-speed governor and emergency braking system, ensure that the stair lift will never travel faster than it is supposed to. Typically, stair lifts travel at about 18 ft per minute.

There are three basic stair lift types: straight, curved and outdoor. Each model is suited to a different type of staircase and comes with a unique set of attributes and benefits.

Contact Comfort Mobility for more information and pricing!

Stannah
Authorized Dealer

Founded in 1867, Stannah Stairlifts is a fifth-generation family business, where customer service, quality and safety come first. We have been challenging and setting standards in stairlift design for more than 40 years. With over 750,000 satisfied customers, Stannah is a name you can trust!

Stannah Comfort Mobility Home Health Care

When to Consider a Stairlift

If stairs are becoming a problem, consider getting in touch with us. You shouldn't have to limit yourself to the first floor or plan your life around a few difficult trips up and down the stairs. Our dedicated team of experienced professionals can help you regain the full use of your home, so you can carry on enjoying life in the place you know and love. Take the first step today. We're standing by and ready to help. Let us share our story with you and show you why, after so many years, Stannah continues to stand out among the world's most trusted stairlift brands.

Standard Features You'll Love

Stannah's exceptional warranty and reliability will bring you peace of mind. Our thoughtfully designed key features make your Stannah stairlift safe and easy to use. Features below apply to all indoor models unless otherwise specified.

Easy-to-Use Controls
The light-touch control allows you to operate the stairlift with any part of your hand.

A Chair that Swivels
Turn to a safe position at the top or bottom of your stairs, with manual swivel levers, or optional one or two-way powered swivel.

Armrest Safety
For your safety, the downside armrest must be lowered before riding.

Safety Sensors
Stop the stairlift if it meets an obstruction.

350lb Weight Capacity

Keyed Lock (not shown)
Prevents unauthorized use.

Powered Footrest
For Starla and Siena 600, eliminates the need to bend over to unfold or fold the footrest.

Retractable Seatbelt
Easy to reach retractable seatbelt, requires only one hand to use (Starla & Siena 600).

Siena 600 Chair Width Options
Available in two width options depending upon your needs.

On/Off Switch
Conveniently placed, prevents the chair from moving unexpectedly.

Adjustable Seat Height
Set during installation for a comfortable and tailored fit .

Battery Operated
Automatically recharging, long-life batteries (not shown) keep your stairlift working in the event of a power outage.

Two Remotes
Call and send your stairlift or operate the powered swivel.

Power-On Light (not shown)

Options

Powered Swivel
The Stannah powered swivel turns the chair to face away from the stairs, for ease-of-use and safety. The powered swivel can be set to swivel at both the top and bottom of the stairs. Stannah offers the best installation solution when there is a door at the top of the stairs.

Retractable Rail
For straight stairs where the rail could be a tripping hazard at the bottom of the stairs, the Stannah retractable rail raises and lowers automatically as the chair moves up and down the stairs.

Seatbelt Options
Our lap-diagonal and five-point seatbelts provide extra restraint over the shoulders and between the legs.

Rudder Control
The rudder control option is helpful for those who may have difficulty with dexterity, for example due to severe arthritis or tremors.
