

EasyCare Full-Electric Bed

The revolutionary EasyCare is a fully configurable healthcare bed offered at price points ideal for care facilities of any size. Enhanced functionality and mobility features allow the bed to be configured to meet a variety of needs—for both the patient and caregiver. Create the bed that works best for your patients and facility with features such as best-in-class integrated width expansion, pedal locking system, reinforced sleep deck, redesigned panel retentions, and new mattress corner stops that adjust with the bed width.

Pedal Lock

Two-Pedal Locking System

Intuitive two-pedal locking system is centrally positioned at the foot end of the bed and easily visible due to color-coded status indicators. Available as a standard option with the roll-at-any height configuration.

Integrated Width

Integrated Width Extension

Provides a sleep surface that expands and retracts from 35", 39" and 42" and quickly adjusts to move through doorways while compliant to HBSW entrapment guidelines. Available at time of order.

Corner Mattress Stops

Corner Mattress Stops

Corner mattress stops provide greater security of the mattress surface and easily adjust to the expanded widths of the frame up to 42 inches.

Panel Retention

Panel Retention

A restructured and more robust sleep surface and panel mounting mechanism designed to provide added stability and extended product life.
