

Features Overview

The P.R.O Matt is a non-powered mattress replacement system featuring our Pressure Redistribution Optimization (P.R.O.) Technology. With the addition of the optional control unit, the mattress provides powered immersion or alternating pressure therapy, allowing facilities to use one mattress for both pressure prevention and treatment.

Quality – Comfort – Incredibly Advanced

Unique Features

- Mattress alone prevents and treats pressure ulcers I-II
- Mattress with ES2 pump treats uncomplicated pressure ulcers stages III-IV
- ProMatt can be used with Joerns Climate Care overlay to add Microclimate therapy
- Enclosed air/foam cells eliminate risk of bottoming out due to power outage
- Firm perimeter reduce falls and entrapment risk.
- One inch memory foam topper enhances pressure redistribution and resident comfort
- Self-calibrating design needs no manual inflation
- Mattress can be used for prevention when pressure ulcers treatment is not required

Clinically Proven Results

- 3 modes of operation and 5 comfort settings (Autofirm, Therapy, Alternate)
- Proven results through pressures mapping and case studies
- 4 individual zones connected by PRO valves mimics that of LAL pressure zones optimizing pressure redistribution
