

Aggregates Product List

About Us

As part of the VIQA Investment Holding in Dubai, Gremlog has a long track record in selling recyclables and industrial by-products to the local and international markets. Gremlog is the focal point of contact of your procurement team for various aggregates.

Application of our Products

Road and Railway Construction: Our recycled aggregate is ideal for use in asphalt and sub-base layers, providing a strong foundation for roads and railways.

Unpaved Surfaces and Temporary Roadways: Whether for temporary roadways, parking lots, or footpaths, our aggregate ensures stability and longevity.

Stone Columns and General Construction: Benefit from our versatile product, suitable for stone columns and a wide range of general construction projects.

In-Mix Raw Material for Cement Production: Our high-quality aggregate can serve as an essential raw material in cement production, enhancing its strength and durability.

In-Mix Raw Material for Cement Production: Our high-quality aggregate can serve as an essential raw material in cement production, enhancing its strength and durability.

Steel Slag Aggregate

Natural Aggregate

Recycled Concrete Aggregate

Recycled Asphalt Roadbase

Locations:

- 📍 Umm Al Quawain
- 📍 Ajman
- 📍 Dubai
- 📍 Abu Dhabi

Steel Slag Aggregate

The slag is conditioned, before being processed to remove the metal content, then crushed and graded to form a versatile aggregate. The steel slag aggregate is a global commodity as an artificial aggregate, with an angular, cube-like structure. The chemical composition is mainly calcium silicate and calcium alumino ferrites. It is hard and dense, durable and weather resistant.

Steel Slag is available in the following sizes:

- 0-3 MM
- 0-5 MM
- 5-10 MM
- 10-20 MM
- 20-40 MM
- 20-100 MM Stone Column
- 0-40 MM Roadbase
- Any other sizes on request

Natural Aggregate

Natural gabbro and lime stones aggregates will be supplied all over UAE with preferred density. The material is available for the concrete and asphalt mixes as per the required specification to meet the customer requirements.

Natural Aggregate is available in the following sizes:

- 0-3 MM
- 3-5 MM
- 0-5 MM
- 5-10 MM
- 10-20 MM
- 20-40 MM
- 20-100 MM Stone Column
- 0-40 MM Roadbase
- 0-50 MM Roadbase
- Any other sizes on request

Recycled Concrete Aggregate

This is produced from the demolished concrete. The material has been crushed and screened properly in different sizes and free from any foreign contamination.

Recycled Concrete Aggregate is available in the following sizes:

- 0-5 MM
- 5-10 MM
- 10-15 MM
- 0-40 MM Roadbase
- Any other sizes on request

Recycled Asphalt Roadbase

This is produced from the demolished asphalt. The material has been crushed and screened properly in order to get a high quality roadbase with a CBR of 103 and free from any foreign contamination. Our recycled asphalt is in accordance with the approved specifications by ADM & MUSANDA.

Recycled asphalt is available in the following size :

- 0-40 MM
