INTRODUCTION

East Environmental Group, Inc. is a Certified Minority Business Enterprise & Small Disadvantaged Business Enterprise that services New York State. East Environmental is an environmental consulting firm that provides a wide range of environmental services to its New York State clients.

East Environmental has two years experience as a company and has been fortunate enough to have completed nearly 20 projects to date. Established in 2008, our services include professional management of asbestos, lead, mold and water intrusion, indoor environmental quality, environmental health and safety management and litigation support.

These projects have been of a wide variety and have all been completed on time and without any violations while under our project oversight. Of these projects, we are most proud of the projects that we handle from the survey testing phases, through the design of the abatement scope, then the project oversight, inspections and air testing during the course of the demolition or renovation of the structure.

Making a difference in our community one project at a time.

These services are available to owners in key industry sectors to include the construction trades, healthcare, utilities, industrial, commercial, retail, insurance, hospitality, government, financial, legal and other key areas in which the protection of public health is valued. The best definition of East Environmental is found in our mission statement:

“The mission of East Environmental is always striving to make a difference in our community, one project at a time. We accomplish this by delivering data and expertise that is accurate, cost effective, and contextually useful in solving issues of public health.”

Our company is defined by our commitment to knowledge, our employees, client relationships, and a dedication to niche growth superiority. We pride ourselves on learning your business and customizing effective programs to ensure compliance and promote

public safety while also helping to reduce liability. East Environmental Group, Inc. is supported by three fully accredited laboratories that specialize in asbestos, metals, molds, and materials quantification services. These laboratories employ the latest in TEM and RCA capabilities.

MANAGEMENT SERVICES

Training of Staff/Employees:

- MSDS Awareness Training
- Operations & Maintenance Training
- Hazardous Materials Awareness Training
- Asbestos Awareness Training
- Lead Awareness Training
- Mold/Fungus Awareness Training

Environmental Site Assessments

(for owned or future property purchases)

- Phase I ESA-To ASTM Standards
- Phase II supplemental hazardous material sampling
- AST/UST Storage Tank leak detection monitoring/recordkeeping
- AST/UST Storage Tank removal certification/sampling
- Environmental Impact Studies/Wetland Assessments

Asbestos Management Services:

- Comprehensive asbestos surveys of facilities
- Design site specific specifications for renovation projects that impact Asbestos Containing Materials
- Construction Oversight/Asbestos Air Monitoring
- Conduct Final Visual Inspections & Clearance Monitoring prior to reoccupancy of each area

Lead Management Services:

- Comprehensive lead surveys of facilities
- Design site specific specifications for renovation projects that impact Lead Containing Materials
- Construction Oversight/Lead Air Monitoring
- Conduct Final Visual Inspections & Clearance Monitoring prior to re-occupancy of each area

Mold, Fungus and Indoor Air Quality Issues:

- Conduct testing of areas that have complaints from occupants
- Write remediation scope of work for each individual case
- Construction Oversight/IAQ Air Monitoring.
- Conduct Final Visual & Clearance Monitoring prior to re-occupancy of each area

Hazardous Materials Communication Program:

- MSDS Review & Maintenance:
 - Onsite analysis of MSDS File for completeness
 - Hazardous Materials Inventory of on-site items
 - Review Quarterly for outdated information and up date accordingly
- Fire Life and Safety Program:
 - Review fire alarm system
 - Generate updated site specific emergency exit CAD drawings (8 1/2" X 11")
 - Check fire extinguisher recharge dates and maintain log on a quarterly basis

CONSULTING SERVICES

Asbestos Consulting Services

Since the inception of the Environmental Services Division in 2008, this staff has been providing professional and effective solutions to clients who seek to survey, manage or provide asbestos monitoring. The staff includes industrial hygienists, certified asbestos consultants, and site surveillance technicians. The group commonly provides professional services to commercial, industrial and government entities. Professional services include asbestos surveys, abatement project design, abatement monitoring, contractor selection assistance, operations and maintenance programs, emergency response, and litigation support.

Lead-Based Paint Consulting Services

East Environmental has always been at the forefront of reducing the health concerns relating to the lead that affects America's children and workers. Close attention to the needs of our clients, proper training, certification of our technical staff, and monitoring of changing technology have enabled East Environmental to continue to be a leader in lead-based paint consulting. We provide XRF Inspections, Risk Assessments, In-place Management, Remediation Design, Remediation Monitoring, Clearance Sampling, Waste Disposal Consultation and Waste Stream Analysis.

Mold Consulting Services

Fire and water damage, plumbing leaks, and poorly maintained HVAC systems are just some of the many conditions that can result in the growth of mold. Often, if these conditions are not controlled, the integrity of the building structure and health of the occupants can be compromised. It is important that the water intrusion source be identified and controlled before mold growth becomes a significant problem, and to insure that an effective abatement plan is implemented. We provide Mold Investigations, Mold Remediation Specifications, Mold Remediation Monitoring, Clearance Sampling, Operations and Maintenance Programs and Litigation Support.

Industrial Hygiene Consulting Services

East Environmental industrial hygienists commonly perform industrial exposure monitoring on employees that are potentially exposed to chemicals above permissible levels. Solvents, volatile organic compounds, toxic organic and inorganic chemicals are routinely sampled. Results of real-time sampling

and/or samples submitted to a laboratory are interpreted by highly experienced staff. Specific recommendations are made to ensure the health and safety of employees. East Environmental Group, Inc. has a vast amount of experience performing OSHA compliance monitoring. The staff is also experienced in performing NIOSH and ASTM standard sampling protocols.

Industrial hygiene consulting services that the group is capable of providing include:

- Chemical Hygiene Exposure Assessment
- Dust Exposures
- Noise Exposures/Hearing Conservation
- Electromagnetic Field Exposure
- Solvent Use
- Industrial Hygiene Program Development

Indoor Air Quality Consulting

New scientific knowledge and media attention has increased the awareness of facility managers, workers, attorneys, and industrial hygienists about the potential of indoor air quality problems. Many of the problems are related to the "tightening" of buildings in order to become more energy efficient. Other problems are related to synthetic building materials, a lack of fresh air in the HVAC system, various outdoor sources, high humidity, temperature levels, and mold growth. East Environmental provides consulting that can effectively solve indoor air quality problems. Our team of qualified indoor air quality specialists can inspect and evaluate a variety of buildings from single-family homes to office buildings. We provide Visual Inspections, On-Site Monitoring and Sampling, Remediation Design & Oversight, Operations and Maintenance Programs and Risk Management Plan

CONSULTING SERVICES

Litigation Support Services

East Environmental has had extensive experience providing litigation support services during the company's two year history. Typically centered on uncontrolled releases of hazardous materials, our consulting staff has provided expert testimony, trial strategy, sampling, analysis, and regulatory review for the purpose of risk assessment or hazard evaluation. East Environmental clients have included insurance companies, property owners, manufacturers, contractors, and homeowners. East Environmental provides services to either the plaintiff or defendant in it's' search and evaluation of objective scientific data. We provide litigation support for Asbestos Contamination, Lead-based paint, Indoor Air Quality & Mold, Occupational Exposures and Laboratory Quality Assurance.

Health and Safety Program Development and Hazard Awareness Training

East Environmental offers a variety of health and safety program development and training services. The Environmental Services division can develop custom environmental and safety management programs that include asbestos, lead and other hazardous materials, personal protection, indoor air quality, workplace safety and ergonomic procedures. Our written programs include policies and procedures, performance checklists and record keeping forms. East Environmental also offers comprehensive training services, which include environmental and safety program development and follow-up services to help minimize workplace injuries and ensure regulatory compliance.

Programs developed by East Environmental include:

- Hazard Communication Program
- Respirator Protection Program
- Chemical Sampling Plans
- Lead Compliance Program
- Lead Hazard Control Plan
- Asbestos Operations & Maintenance Program
- Mold Operations and Maintenance
- Injury Illness and Prevention Program (IIPP)
- LEED EAp1 Fundamental Commissioning Plan
- LEED EQc3 Construction IAQ Management Plan
- Lockout Tagout (Hazardous Energy)
- PPE Program
- Electrical Safe Work Practices Program
- Confined Space Entry Program
- Process Safety Management (PSM)

CLIENTS & PROJECTS

In every business sector, there are unique issues and objectives. East Environmental has the expertise to assist clients in identifying and resolving issues related to the environment. We recognize that the private sector is faced with the challenge of balancing community needs with federal, state, and local regulations. With our timely and cost-effective services, East Environmental staff has been helping clients meet this challenge for over two decades.

East Environmental Group, Inc. has successfully completed more than 20 environmental projects for clients in both the private and public sectors. We have the technical expertise and knowledge to see your project through from initial planning to final stages, ensuring that compliance procedures are followed and environmental impacts are effectively mitigated.

FEATURED PROJECTS:

- SUNY Upstate Medical University – Biotech Research Center – *Environmental Services*
- Village of Fayetteville New York – Residential Home – *Environmental Services*
- Home HeadQuarters Inc. – *Environmental Services*
- Scottish Inn & Suites – *Environmental Services*
- Central Park Rehabilitation Center – *Indoor Air Quality Services*
- Community General Hospital – *Indoor Air Quality Services*
- Dunk & Bright Furniture – *Indoor Air Quality Services*
- Domino's Pizza Inc. – *Pre-purchase Land Investigation*
