

Get Started with Freely Accessible, Open Educational Resources

Search Our Digital Curriculum Libraries:

OERColorado maintains two digital curriculum libraries. One is a Hub attached to the large OER Commons library. The other is a stand alone Colorado focused Microsite. Access to educational resources in both digital curriculum libraries is free, without the need to create a profile.

Hub@ www.oercommons.org/hubs/oercolorado

Microsite@www.oercolorado.org

Create a User Profile to Save, Share and Create OER:

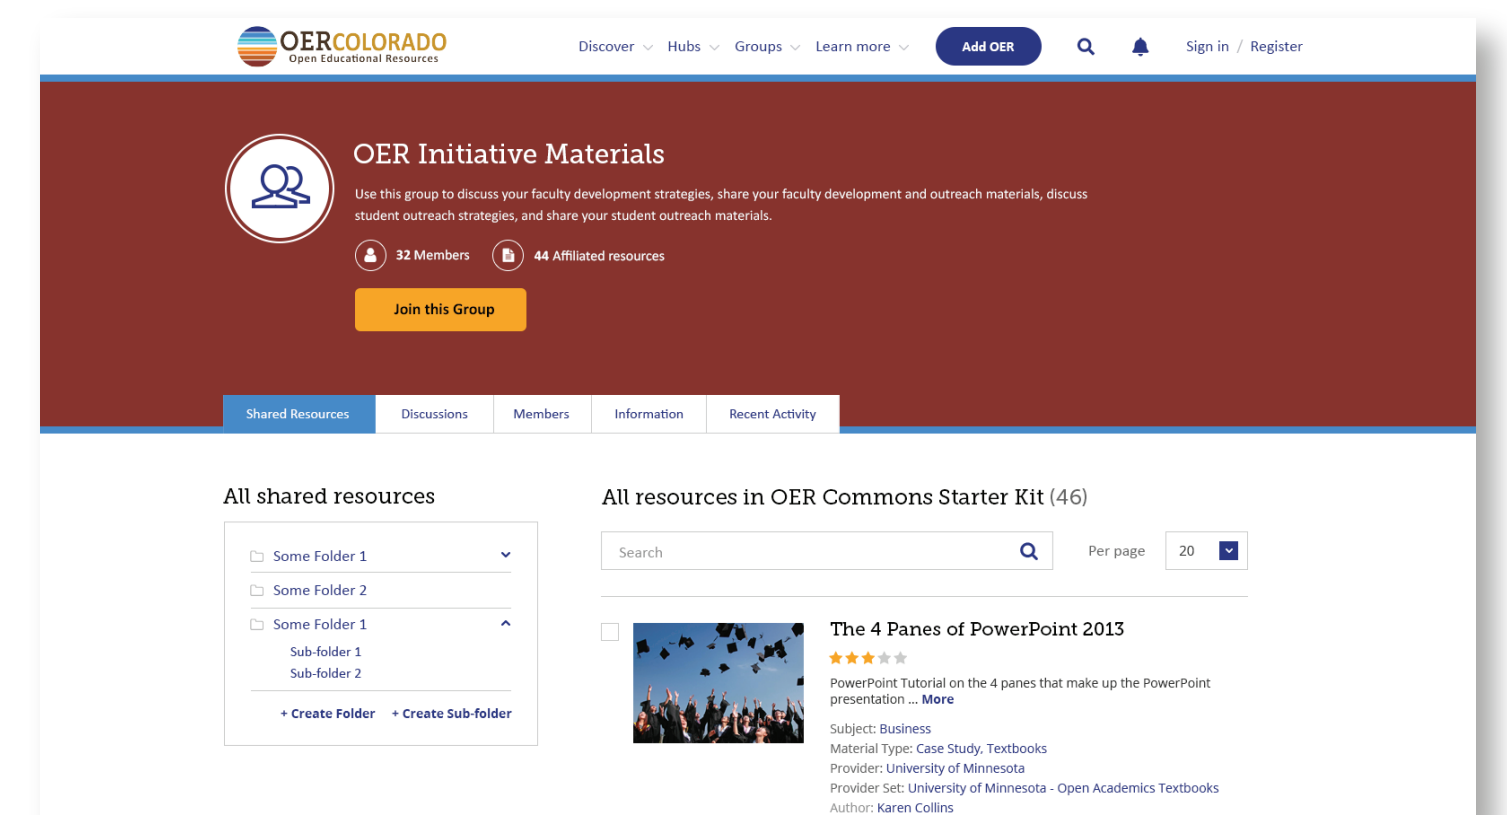

Create a free **User Profile**. A user profile allows you to save OER for later use, to share OER and collaborate in a group, and to create OER using the Add OER button.

Add OER

With a user profile, you can also **Add OER** you have created to share with others by publishing to the library or sharing in a group. Creation is easy! Use the built in Open Author Tool or upload from a text editor or Google Drive.

Join or Create a Group to Share OER and Collaborate on Curriculum Initiatives:

A user profile allows you to join or create a group. Groups allow like minded users to collaborate on curriculum, share and organize OER resources in folders and to communicate using discussion forums. The Open Author curriculum tool allows easy content editing of shared resources.

Browse Our Content Area, CTE and Communities of Practice Hubs:

The OERColorado Microsite organizes content into Microsite Hubs. There are MHubs for all 8 Colorado CDE Subject Areas, 6 CTE Career Clusters plus Workforce Readiness, as well as various Communities of Practice.

Subject Areas
