Class Description:

This hands-on class introduces students to the world of needle felting. Throughout the course, students will learn the basics of this art form, including how to manipulate wool roving using felting needles to create both 2D and 3D objects. From simple shapes to more detailed miniatures, students will gain the skills necessary to craft their own unique felted creations. *We will be working with real needles. Even experienced felters will prick their fingers, so this is to be expected. Students need to be mature enough to handle the materials safely.

Any unsafe behavior will result in immediate dismissal from class.
