Winter Weather Parking Guidelines

In an attempt to make our streets safer and allow run off snowmelt to more efficiently wash away in our storm drains, the LR DRC discourages residents and neighborhood guests from parking in the street during times of snowfall, and instead encourages the use of garages and driveways during snow storms and the time immediately following.

Doing so will make it easier for JeffCo plows to clear more of our neighborhood streets, making them safer and easier to access, particularly on the south-side of all streets, where snow commonly takes much longer to dissipate.

Additionally, residents of sloping and bended areas of Fox Hills Dr. and Weaver Gulch Dr. should refrain from street parking as snow and ice create especially hazardous conditions on hills.

We appreciate your voluntary compliance with this request. Jefferson County does not require vehicles moved for plowing, but we hope that you will understand our concern and see that we are requesting this for resident safety and general appeal of our neighborhood.

Thank you for your understanding and consideration
