

Acceptable Use Policy

Last Updated: July 3, 2026

SUMMARY OF KEY POINTS

- **Play fair:** Do not use cheats, bots, or exploits to gain an unfair advantage in our games.
- **Respect the code:** Do not attempt to reverse engineer, decompile, or steal our Android apps, including our Java, C++, and Python architecture.
- **Be kind:** Treat other users with respect. Harassment, hate speech, and abusive behavior are strictly prohibited.
- **Protect the platform:** Do not interfere with our hosting or payment processing services.
- **Consequences matter:** Breaking these rules can result in temporary suspensions or permanent bans from our apps and games.

Introduction

Welcome to Krizu Studios! We are passionate about building engaging, high-quality apps and games for Android. To keep our community safe, our games fair, and our software secure, we have established this Acceptable Use Policy.

This policy outlines exactly what you can and cannot do when downloading, accessing, or playing any Krizu Studios application. We want everyone to have a great time, and setting clear boundaries helps us ensure a positive experience for all our users. By using our apps and games, you agree to play by these rules.

What You Cannot Do & Why

To maintain a secure and enjoyable environment, we require all users to avoid certain behaviors. We prohibit the following activities because they ruin the experience for others, compromise our security, or violate the law.

Fair Play and Community Respect

Games are only fun when everyone plays by the same rules. When interacting with our apps or other players, you must not:

- **Use cheats or exploits:** Do not use aimbots, auto-clickers, unauthorized mods, or any third-party software designed to give you an unfair advantage.
- **Harass others:** Do not send threatening, abusive, defamatory, or hateful messages to other players or our development team.
- **Spam:** Do not flood our apps with repetitive messages, unauthorized advertisements, or promotional material.
- **Engage in illegal acts:** Do not use our apps to facilitate any illegal activity, including fraud, gambling, or the distribution of illicit materials.

Technical Integrity and Security

We spend a massive amount of time writing and optimizing our Java, C++, and Python code to bring you the best Android experiences possible. To protect our intellectual property and platform stability, you must not:

- **Reverse engineer our software:** Do not decompile, disassemble, or attempt to extract the source code of our Android applications.
- **Distribute malware:** Do not upload or transmit viruses, trojans, worms, or any malicious code through our services.
- **Disrupt our infrastructure:** Do not launch denial-of-service (DoS) attacks or attempt to bypass the security measures of our essential service providers, including our hosting platforms and payment processors.
- **Bypass access controls:** Do not attempt to access administrative areas of our apps or use accounts that do not belong to you.

Rule Enforcement and Your Privacy

When you use our apps, we collect standard business operational data to ensure everything runs smoothly. We also use this data to investigate potential violations of this Acceptable Use Policy.

If we suspect someone is cheating, hacking, or harassing others, we will review their operational data and account activity. We share this information only with our essential service providers (such as our hosting

and payment processing partners) when absolutely necessary to resolve security incidents or process fraudulent transactions.

Because we operate in the United States, we handle all investigations and data processing in strict compliance with applicable US state privacy laws, including the California Consumer Privacy Act (CCPA), the California Privacy Rights Act (CPRA), the Virginia Consumer Data Protection Act (VCDPA), the Colorado Privacy Act (CPA), and the Connecticut Data Privacy Act (CTDPA). You have rights regarding your data under these laws, which are fully detailed in our Privacy Policy.

How We Handle Violations

While we strive to maintain a perfect environment, we cannot guarantee we will catch every violation immediately. However, when we do identify a breach of this policy, we take it seriously.

Depending on the severity of the violation, we may take one or more of the following actions:

- Issue a formal warning to your account.
- Temporarily suspend your access to specific features, games, or apps.
- Permanently ban your device or account from all Krizu Studios products.
- Report severe technical abuse or illegal activities to the appropriate law enforcement authorities.

We reserve the right to enforce these rules at our sole discretion. If your account is suspended or banned for violating this policy, you will not be eligible for refunds on any past purchases.

Reporting Abuse

We rely on our community to help keep Krizu Studios a great place to play. If you encounter another user breaking these rules, or if you discover a bug or exploit in our Android apps, please let us know immediately. Do not exploit the bug yourself—report it so we can fix it.

Contact Us

If you have questions about this Acceptable Use Policy, need to report a violation, or want to clarify whether a specific action is permitted, we are here to help.

You can reach us through the following channels:

- **Email:** endurco@outlook.com
- **Website / Community Hub:** krizu.xyz

Next Step: If you are currently using any unauthorized mods or third-party software with our games, please remove them immediately to ensure your account remains in good standing.
