

End User License Agreement

Effective Date: July 3, 2026

Welcome to Krizu Studios! We are passionate about building engaging apps and games for Android using Java, C++, and Python. Before you dive into our software, we need to establish the ground rules for how you can use our creations. This End User License Agreement (EULA) is a legal agreement between you and Krizu Studios that outlines your rights and responsibilities when downloading, installing, or playing our games and applications.

Summary of Key Points

At a Glance:

- **Personal Use Only:** You are getting a license to play and use our apps for your own personal enjoyment, not to sell or distribute them.
- **Play Fair:** Please do not hack, reverse engineer, or steal our code. We work hard on our Android apps, and we want to protect that effort.
- **We Own the App, You Own Your Data:** We retain all ownership of the games and software. You retain ownership of any personal data you generate.
- **Things Change:** We will update our apps to fix bugs or add features, which means older versions might eventually stop working.
- **No Perfect Guarantees:** We provide our apps "as is." While we strive for a flawless experience, we cannot promise our software will be completely bug-free on every Android device.

1. License Grant

When you download a Krizu Studios app, we are not selling you the software; we are giving you permission to use it. We grant you a personal, limited, non-exclusive, and non-transferable license to install and use our Android applications.

Scope of Use

This license is strictly for your personal, non-commercial entertainment and utility. You may install our applications on any Android devices that you personally own and control.

Territory Restrictions

You may use our software worldwide, provided you are not located in a country subject to a U.S. Government embargo or designated by the U.S. Government as a "terrorist supporting" country.

2. Restrictions

To protect the integrity of our games and the community of players who enjoy them, we have to set some clear boundaries on what you can do with our software.

No Reverse Engineering

Our apps are built using a mix of Java, C++, and Python. You may not decompile, reverse engineer, disassemble, or attempt to extract the source code from any of our applications. We enforce this to protect our proprietary development techniques and intellectual property.

No Redistribution or Sublicensing

You may not sell, rent, lease, lend, distribute, or sublicense our apps to anyone else. If your friends want to play, please direct them to download the app themselves.

No Modifications

Unless we explicitly provide a tool or feature that allows for it (like a level builder), you may not modify, adapt, or create derivative works based on our software. This includes creating cheats, hacks, or unauthorized third-party clients that alter the intended experience of our games.

3. Ownership

Clarity around who owns what helps prevent misunderstandings down the road.

Software Ownership

Krizu Studios retains all right, title, and interest in and to our applications. This includes all code, graphics, animations, music, text, and overall design. Your license simply gives you the right to use the software, not ownership of the software itself.

User Data Ownership

You retain all rights to the personal data you generate while using our apps. We do not claim ownership over your personal identity or the specific user-generated content you might create within the boundaries of our games, provided it does not infringe on our underlying intellectual property.

Feedback and Suggestions

We love hearing from our players. If you send us feedback, bug reports, or suggestions for new features, you agree that Krizu Studios is free to use those ideas to improve our games without any obligation to compensate you. This allows us to freely implement the best ideas from our community.

4. Updates & Support

The mobile app landscape moves quickly, and we continuously work to improve our software.

Update Policies

We may automatically deploy updates, patches, or modifications to our apps to fix bugs, enhance security, or introduce new content. These updates may occur in the background without additional notice. By using our apps, you consent to receiving these automatic updates.

Support Availability

We provide support for our applications as our resources allow. While we try to address major bugs and crashes promptly, we do not guarantee 24/7 technical support or immediate resolutions to all reported issues.

Backward Compatibility

As we update our games to take advantage of newer Android operating systems and hardware, we may drop support for older devices or older versions of Android. We cannot guarantee that our apps will remain compatible with outdated hardware indefinitely.

5. Privacy & Data

We respect your privacy and are committed to handling your data responsibly, in full compliance with U.S. privacy frameworks including the California Consumer Privacy Act (CCPA/CPRA) and other applicable state privacy laws (such as VCDPA, CPA, and CTDPA).

Data Collection by the Software

To keep our games running smoothly, our software collects standard business operational data. This includes basic telemetry, crash reports, and device information. We collect this data solely to understand how our apps perform in the real world and to fix technical issues.

Essential Third-Party Services

We partner with essential service providers to operate our business. This includes secure hosting providers and payment processors (if you make in-app purchases). We only share the minimum amount of data necessary for these third parties to perform their specific functions.

Exercising Your Rights

Depending on your state of residence, you have specific rights regarding your data, including the right to know what we collect, the right to request deletion, and the right to opt-out of certain processing. For a complete explanation of our data practices and how to exercise your rights, please review our full Privacy Policy.

6. Termination

This agreement remains in effect until terminated by either you or Krizu Studios.

Automatic Termination Conditions

Your license to use our apps will terminate automatically and immediately if you fail to comply with any of the restrictions or terms outlined in this EULA. We reserve the right to suspend or terminate your access to our software if we detect cheating, hacking, or abusive behavior.

Effect of Termination

If this agreement is terminated, you must immediately stop using the application and delete all copies of the software from your Android devices.

Data After Termination

Upon termination, we will retain your standard operational data only as long as necessary for our legitimate business purposes, such as resolving disputes or complying with legal obligations, after which it will be securely deleted.

7. Warranties & Disclaimers

We want to be completely honest about the limitations of software development.

What Is Not Guaranteed

Krizu Studios provides all applications on an "AS IS" and "AS AVAILABLE" basis. We do not warrant that our apps will be entirely free of bugs, crashes, or interruptions. We also do not guarantee that our software will meet your specific personal expectations or work flawlessly alongside every other app on your device.

Limitation of Liability

To the maximum extent permitted by applicable law, Krizu Studios shall not be liable for any indirect, incidental, special, or consequential damages arising out of your use or inability to use our applications. This includes, but is not limited to, damages for loss of profits, data loss, or device malfunction, even if we have been advised of the possibility of such damages.

8. Governing Law

This EULA and any disputes arising out of or related to it will be governed by and construed in accordance with the laws of the United States, without regard to its conflict of law principles. Any legal action or proceeding related to our applications shall be brought exclusively in the appropriate state or federal courts located within the United States.

Contact Us

If you have any questions about this End User License Agreement, or if you need to reach out to Krizu Studios for any other reason, we are here to help.
