PRE-FILTERS

- ★ Repels Rain and Snow
- ★ Extends Filter Service Intervals
- ★ Better Fuel Economy from a Cleaner Air Filter
- ★ Saves Money \$\$\$
- ★ Protects Engine and Air Filter
- ★ Horsepower Levels Maintained Longer
- ★ Test Results Show No Significant Airflow Loss

SCOTT AG SOLUTIONS, LLC

Why do I need a pre-filter?

Freedom Air Filters pre-filters are designed to keep out larger particles of debris such as grain chaff, dirt and sand from getting into and clogging the pleats of the air filter. Premature clogging of an air filter will result in loss of horsepower and an increase in service intervals. Our pre-filters are uniquely designed to protect your engine and air filter without sacrificing airflow or horsepower. Particles as small as .005" are filtered out extending air filter life. Even in harsh conditions, including snow and rain, a pre-filter will enhance your filter's ability to continue flowing the necessary air required for maximum performance while reducing the possibility of water ingestion into the engine. Proper use of a pre-filter will save money on filter cleanings or replacements and extend engine life.

Will adding a pre-filter reduce my airflow or horsepower?

Adding a pre-filter will not have any significant reduction in airflow. (Independent lab test results available upon request.) Our pre-filter keeps your primary filter cleaner for a longer period of time allowing your engine the ability to sustain its original airflow and horsepower for an extended amount of miles and time.

How long will a pre-filter last?

This will depend entirely on driving conditions and the amount of miles driven. Generally speaking, we recommend changing the pre-filter every 6-12 months to maintain water repellency. Your pre-filter will actually deflect debris for a longer period of time; however, the water repellency feature will be less effective over time and cleanings.

Can I re-use the pre-filter?

Yes. Our pre-filters are washable and reusable. It may be washed with soap and water and re-installed over and over.
