

## PROGRAM OFFERINGS

### COURSES/WORKSHOPS

- HTML/CSS
  - JavaScript
  - Python
  - Squarespace
  - Game Design
  - IT Productivity Tools
  - Microsoft TEALS
- 

### TECHNOLOGY FOUNDATIONS

- Design Principles & Prototyping
  - Software Design and Delivery Methodologies
- 

### MENTORSHIP

- Mock Technical Interviews
  - Upskill activities
  - Letter of Recommendation
  - Certification exam vouchers
  - Math Tutoring
  - Coding assignment assistance
  - Internships/Career Opportunities
-

# GIRLZ TECH

INSPIRED BY J.A.G.

## INSPIRES THEM TO THINK

Increase diversity in computer science by reaching girls of all backgrounds where they are at in their skill-level, in their schools, and in ways that inspire them to keep learning.

## BROADENS THEIR MINDS

We're pushing the future of tech forward by creating a space for young women to gather, grow and evolve - all while being a conduit for companies to engage this talent.

## PLATFORM

- Cultivate young girls and non-binary adults who have a lifelong desire to continue to learn and grow in the areas of science and technology but are unable to fulfill that desire due to gender, race or income inequality
- Dispel stereotypes associated with high tech jobs by introducing students to people currently in those roles, providing personal role models and mentors
- Raise awareness in the urban communities about the variety of exciting and meaningful careers available in the technology industry
- Introduce coding and computer science through hands-on, interactive activities and projects
- Help them build a lifelong connection with other members of our program
