Shaver Lake Heights Water Assn – February 19, 2026

BOIL WATER NOTICE

Boil Your Water Before Drinking or Food Preparation to Avoid Illness

Due to loss of power in the distribution system, the State Water Resources Control Board, Division of Drinking Water and the Shaver Lake Heights Water Assn as a safety precaution are advising all residents receiving this notice to only use boiled tap water or bottled water for drinking and cooking.

Please note that this is a precautionary measure due to the power outage to ensure water quality is maintained and is safe to drink

We will be injecting chlorine into the water immediately after power is retained and will inform you when tests show that water is safe to drink, and you no longer need to boil your water. We anticipate receiving test results in a few days at which time a cancellation notice will follow.

If you have questions about other uses of tap water, such as bathing and dish washing, please call your water system provider.

Do not drink the water without boiling it first

- Boil all water for one (1) minute (rolling boil).
- Let water cool before drinking.
- Use boiled or bottled water for drinking, brushing teeth, and food preparation until further notice.
- Boiling water kills bacteria and other organisms in the water.

If you are unable to boil your water:

Household unscented liquid bleach

- For clear water, use 8 drops (1/8 tsp.) of bleach for 1 gallon of water. For cloudy water, filter through a clean cloth and use 16 drops (1/4 tsp.) of bleach for 1 gallon of water.
- Mix well. Allow to stand for 30 minutes before using.
- Water may taste or smell like chlorine. This means disinfection has occurred.

Water disinfection tablets

- Please follow the manufacturer's instructions.

For More Information

If you are concerned about your health or the health of a family member, contact your health care provider.
