

Herr, Tommy@Waterboards<tommy.herr@waterboards.ca.gov>

Hello Bob,

Yes, Shaver Lake Heights Water Association is required to maintain a program that is in compliance with the State Water Board Cross-Connection Control Policy Handbook for the protection of the water system and treatment facilities from possible cross-connections. Shaver Lake Heights Water Association is identified as a public water system, so the requirements of the CCC plan will be required.

Thank you,

**Tommy Herr**

Water Resource Control Engineer
