

FINAL TWO MONTH PILOT SUMMARY

11,200 MEALS MADE

320 CHILDREN FED DAILY

350 bags WASTE INCINERATED DAILY

17 YOUTHS TRAINED

INCOME MADE : **10,000 KES**

POST-PILOT UPDATES

Collecting Waste

One major challenge we faced during the pilot was collecting enough waste to run the cooker for 8 hours. We now collaborate with over 200 families who bring their waste to us every week for free.

Bread Baking

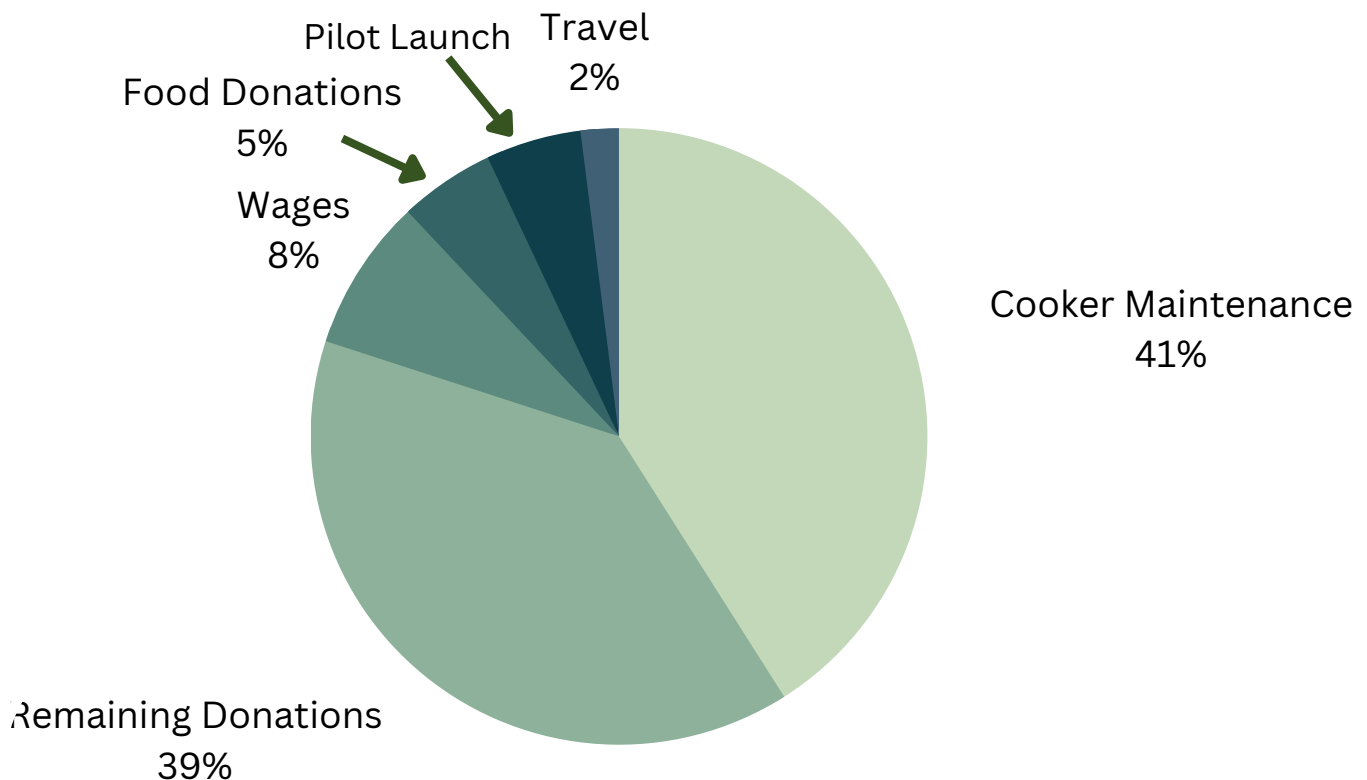

During the Pilot, our focus was on catering for the school. In the past 2 months, our volunteers have increased our bread baking efforts. We now sell an average of 16 breads per day. There is still work to do!

Youth Engagement

We realised the importance of working with local youths to scale up our project. We have therefore trained 10 new youths from two youth groups this month; Downtown and MCO Alumni. They have begun rotation!

Your continued support is invaluable...

HOW YOUR DONATIONS WERE USED:

The **remaining donations** will be used to support our volunteers and repair the shower blocks.

DURHAM UPDATES

Fundraising Sales

Our team in the UK organized 3 fundraising sales selling jewellery. Many thanks to our sponsor **Lounge** for making these events happen.

TOTAL AMOUNT RAISED:
£800

Pitch at the Amazon Headquarters

Our team recently attended a regional Enactus competition in Edinburgh. Presenting at Amazon's headquarters in Edinburgh, we received positive feedback and advice on where to improve our project.

**WE
NEED
YOUR
HELP!**

We are still working towards financial sustainability, and are open to financial advice on how to make our business model sustainable.

Our next investment idea to drive the project is incorporating showers as an income stream.

Please reach out if you have advice and/or can connect us to a potential investor.

Thank you on behalf of the Team.
