

Packaging Assessment for a diversified, global equipment manufacturer with sales in excess of \$5 billion.

Objectives

- ◆ Increase load stability.
- ◆ Reduce the amount of packaging used.

Current Situation

- ◆ Pallet is very stable which is mostly attributed to the strapping used.
- ◆ Using 4.35 ounces of stretch film which does not increase the amount of containment force.

The Impact of Rite-Gauging

- ◆ Utilized Sigma Summit 63G and achieved containment forces of 6 LBS.
- ◆ Reduced the amount of film used to 3.5 ounces.
- ◆ Eliminated strapping and cornerboards...we did not have the client's costs for strapping and cornerboards to determine a cost reduction number.
