Andrew's chart on its surface looked easy for him, as he has Jupiter ruling Sagittarius with FIRE signs: however, a closer look at this shows nothing but pain and suffering because he would not have financial freedom until War arrived. Scorpio ruled his Sun, Venus and Mars in the sky when he was born. Desire grew from personal suffering. Mercury would offer him value from the Unseen (Pluto = Oil) and he would receive above and beyond Justice.

He was 38 upon his initial inspiration, discovery.
