

Hermes,
Mercury

Aphrodite,
Venus

Ares, Mars

Zeus, Jove

Cronos, Saturn

G

Uranus
(Ouranos)
Caelus

Poseidon,
Neptune

7

ROMAN

1

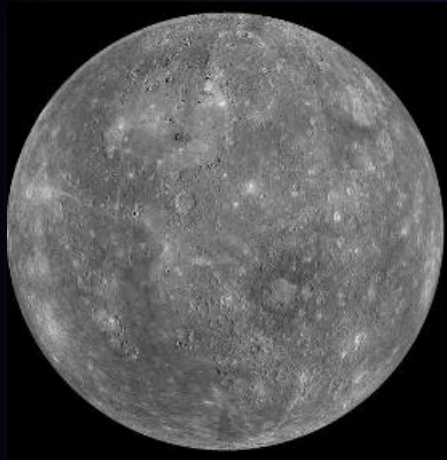

GREEK

- Mercury: The Messenger
- Venus: Goddess Love
- Earth: Neither Greek nor Roman (it is Germanic, Old English)
- Mars – God of War
- Jupiter – King of the Gods
- Saturn – God of Agriculture & Time
- Uranus – Greek, Sky.
- Neptune – God of the Seas

MERCURY

SMALLEST

No moons

MERCURY = 11
MASTER NUMBER

"ORBIT, MYTH, & ATMOSPHERE"

- Looks like a moon; yet has no moons
- It has extreme 'swings' (temperature wise) – like mood swings, can be hot, can be cold
 - Venus is hotter in temperature than Mercury: 800F (M) vs. 872F (V)
 - Has ice water at its poles (that really never see the sun)
 - Enormous **iron** core that takes up 50% of the planet's volume

ORBIT AROUND THE SUN:

- 88 Days [7 numerology number] – seeker, thinker // 176 days for Sunrise to Sunrise
- Fastest planet to orbit the Sun; has a 3:2 spin-orbit
- Has an egg-shaped orbit (Phanes)

MYTH:

- Hermes (G) and Mercury (R) are known for trade, travel and speed
 - Both had winged sandals – feet – called **taloria**
 - Color **yellow** represents Hermes
 - God of financial gain, commerce, communication and travel **and** trickery & thievery
 - *Swift messenger*

MERCURY EXOSPHERE ATMOSPHERE:

- Oxygen (8), Sodium (11), Hydrogen (1), Helium (2), Potassium (19): (19-3-19 mirror represents a mirror of ideas, or the egg, in our creativity and **self-expression**.
 - **19+19 = 38, deduced to 11** – MASTER NUMBER: illuminator, The Messenger.

MERCURY

SMALLEST

MERCURY =
DISSOLVES SILVER &
GOLD

MERCURY GEMATRIA:

*You Are A God
Astrology
Supreme Ascension
Photon Source Code (Quantum of
Light)*

"MERCURY'S ELEMENTS"

POTASSIUM (19: K)

- Supports Cognitive Function by helping to send electrical signals between neurons
- Sodium-Potassium "pump" – neurotransmitter release, brain cell communication
- Enhanced Memory and Focus
- Improved blood flow
- Delivers more oxygen to the brain (reduces brain fog)
- Potassium helps to deliver Serotonin (mood regulator)
- Bananas, spinach, avocados, sweet potatoes & beans

SODIUM (11:Na)

- Electrolyte for nerve impulse transmission
- Maintains cerebral fluid balance
- Primary driver of the ACTION potential

OXYGEN

- Brain consumes 20% of the body's supply
- Deep breathing improves oxygen intake
- Oxygen transport is improved by iron-rich foods: Spinach, lentils, red meat, berries & nuts

Silver is harder than gold, yet softer than copper

*Mercury is *liquid* silver

MERCURY ATOMIC #: 80

*Om – sacred Sanskrit symbol, mantra
Essence of supreme being*

VENUS

HOTTEST

No moons

"ORBIT, MYTH, & ATMOSPHERE"

ORBIT AROUND THE SUN:

- 224.7 Earth Days for 1 trip around the sun
- Travels at 21.77 miles per second
- Venus **spins clockwise** on its axis (backwards) – Sun rises in the West, Sets in the East
- Sunlight travels to Venus in 6 minutes; to Earth, 8 minutes

MYTH:

- **APHRODITE** – goddess of love, beauty, passion, pleasure
 - Dove, scallop shell, rose, myrtle – her symbols
 - She rose from the sea foam of Uranos' castrated 'parts' and married to Hephaestus (God of blacksmith & fire)
 - Had an affair with God of War (Ares)
- **VENUS** – Goddess of love, beauty, sex and fertility
 - Weakness: deep vanity, quick anger and vulnerability during combat; power relies on charm and desire
 - The physical beauty of someone can be their biggest weakness as well

VENUS EXOSPHERE ATMOSPHERE:

- Carbon Dioxide (14) (chemical compound: Carbon + Oxygen,, Nitrogen (7:N), Sulfuric Acid (17) (chemical compound of Hydrogen & Sulfur): 14-7-17
 - Carbon: 6
 - Oxygen: 8
 - Nitrogen: 7
 - Hydrogen: 1
 - Sulfur: 16

VENUS = 7 IN RAW ELEMENT (ignores the compounds):

- 7 Represents Seeker, Mystic, Wisdom, Introspection
- A relentless quest for truth

VENUS GEMATRIA: 1035

- News
- Alcohol Opens the Door to a Demon God
- Apollo is Alive
- Revenue

VENUS

HOTTEST

2

VENUS: COPPER

Chemically,
Venus is a
world that
needs
relationships
to stabilize.

"VENUS ELEMENTS"

REACTIVE NON-METALS: OXIDATION, RUSTING, COMBUSTION

CARBON (C:6) – four strong **covalent bonds** by sharing 4 outer **valence electrons** (4:4 mirror)

- Acts to pull oxygen away from metal oxides (Such as Iron Core) during industrial smelting
- Carbon occurs naturally in various forms, primarily graphite & diamonds
- Building Block to Life
- A Bonding Agent

OXYGEN (O:8) – Highly reactive and readily combines with almost all other elements to form oxides

❖ Carbon with Oxygen burns at high temps

NITROGEN (N:7) – Highly reactive with 3 unpaired electrons ready to form covalent bonds

HYDROGEN (H:1)

SULFUR (S:16) – bright yellow brittle solid; can form with other compounds except noble gasses

- Sulfuric Acid: Primary industrial use, creating fertilizers, refined petroleum and chemicals

Covalent bonds are chemical links where atoms share pairs of valence electrons, typically occurring between nonmetal elements, to achieve stable outer electron shells

Valence electrons are the electrons in the outermost shell of an atom. They control how elements react, form chemical bonds,

Myth:

- Venus (the goddess) is married to the one who tames volatile materials (mirrors the literal planet).
- Venus (the planet) is composed of volatile materials that would need a stabilizing partner to reach equilibrium.
- Hephaestus is the archetype of the stabilizer — the one who binds, shapes, and cools.
- Reactive non-metals also behave **explosively** like Ares (God of War, her affair): They ignite, corrode, destabilize and create violent reactions

VENUS

2

Breakdown:

- ❖ A place with no moon (no stabilizer)
- ❖ A goddess defined by relationship
- ❖ A chemistry defined by covalent bonding
- ❖ A marriage defined by craft (Hephaestus)
- ❖ An affair defined by conflict (Ares)
- ❖ A planet defined by internal instability

She is the goddess who creates bonds, who pulls others into relationship, who stabilizes through attraction rather than isolation. She is not a solitary deity. She is a connective force. *And the planet mirrors that.*

Venus's Planetary Make-up (Greek) Comparison:

- Sulfuric acid clouds (corrosive, warlike)
- CO₂ greenhouse trapping (binding, enclosing)
- Volcanic outgassing (Hephaestian fire)
- Run-away atmospheric reactions (Ares-like chaos)

Venus's chemistry is:

- ✓ relational
- ✓ reactive
- ✓ volatile
- ✓ stabilizing only through bonding
- ✓ beautiful but dangerous
- ✓ transformative
- ✓ dependent on interaction

- *Hephaestus: controlled binding, forging, shaping*
- *Ares: explosive reaction, violent release, destabilization*

EARTH

3

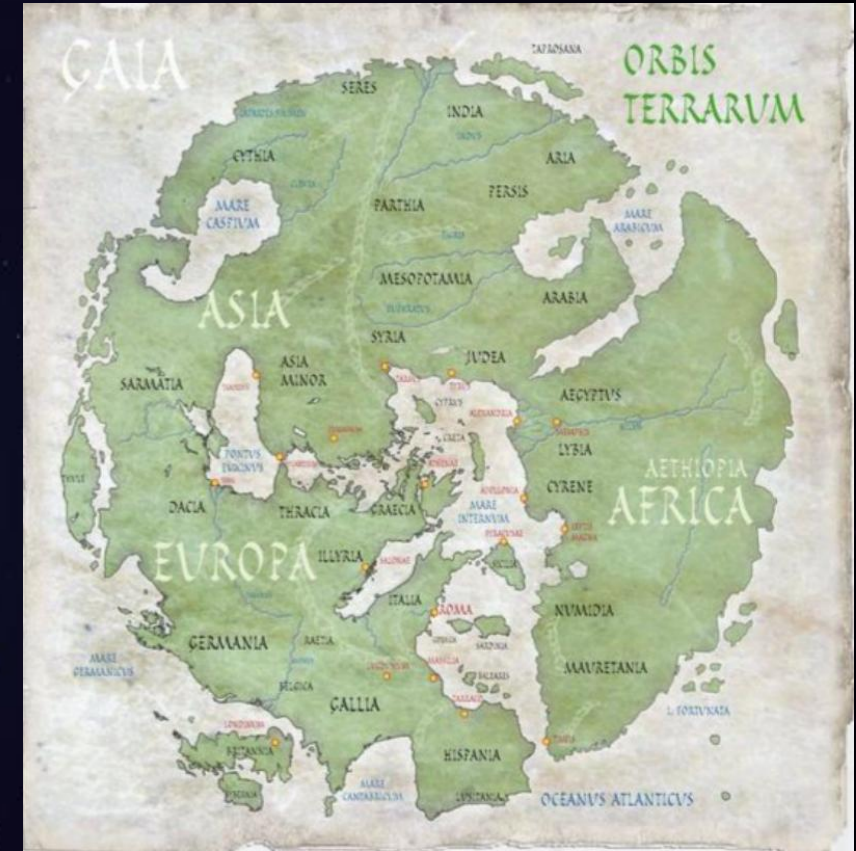

GREEK INTERPRETATION:

- Gaia (Living Mother) was viewed as stable, nurturing and sacred
 - Emerged out of Chaos (the dark void); at the dawn of Creation (Thesis) along with Hydros (Water) and Mud
 - Gave birth to mountains, sea and sky
 - Produced Titans, Cyclopes, Giants – 1st generation
 - “Mother of All Creation”
- A flat earth surrounded by Oceanus as a cosmic river and below a great pit, Tartarus
- Covered by a solid sky, like a dome resting over Earth (firmament)
 - Earth was the center of human experience.

ROMAN INTERPRETATION:

- Believed it to be spherical, stationary Earth and at the absolute center of the Cosmos
- Ptolemy refined Roman cosmology – Earth as center, planets moving in epicycles, system of nested spheres
 - Two Tiered Cosmos: perfection above, corruptible below
- Epicurean: One world among many

ETYMOLOGY “Earth” = Old English eorpe, and proto-Germanic erpo; meaning “ground, soil, dry land.”

- Greek: Gaia
- Roman: Terra, Humus, Solum

MARS

4

COLD

POTATO SHAPED MOONS OF MARS:

1. Phobos (Fear, Phobia) – 14 miles across; moves closer to Mars by about 6 feet every 100 years; destined to crash into the planet or break into a ring (not anywhere near in our lifetime)
 1. Orbits Mars 3x a day
2. Deimos (Dread) – 7.5 miles across
 1. 30 hours to complete one full trip

MYTH:

- Mars is the Roman God of War, an agricultural Guardian, mythical father of Rome's founders (Romulus, Remus twin brothers)
 - *Son of Jupiter & Jove, lover to Venus*
- Represents *the abundance of the fields, battles that must be won to maintain a thriving & well fed community, such as Rome.*
- Month of **March** is named after Mars/Ares

PLANET MARS, COMPOUND:

1. 4TH Planet from the Sun [4 is a number of tension, like 4 corners of a square, 4 winds, etc]
2. Cold and Dusty desert world = Red Planet (iron oxide)
3. Diameter of 4,212 miles (deduced to 9: endings)
4. Composed of a very thin, layer of gases primarily composed of carbon dioxide (95%), molecular nitrogen (~3%), and Argon (~2%)

MARS

"MARS ELEMENTS"

COLD: GAS

MARS = IRON

CARBON DIOXIDE: Carbon dioxide is a clear gas with the chemical formula CO_2 , made of one carbon and two oxygen atoms (1:2 RATIO). It is formed via **combustion, fermentation & respiration (exale)**

- Produced when fossil fuels burn (coal, oil, natural gas)
 - Carbon Dioxide can be expelled upon wildfires and volcanic eruptions
- Adds fizz in soda drinks
- Freezes into dry ice for keeping things cold

MOLECULAR NITROGEN: Molecular nitrogen (N_2) is a colorless, odorless, and mostly *inactive* gas made of two nitrogen atoms linked by a **strong triple bond**. It makes up about 78% of Earth's air and is a key building block for life.

- Used by nature to make amino acids, proteins, DNA
- Industry: Used to make ammonia for plant fertilizer
- Liquid Nitrogen is very cold and used to Freeze food

ARGON: Symbol Ar, Atomic Number: 18

- Colorless and Odorless gas; on Earth it is also less than 1% (3rd most abundant gas in the Air)
- Has a full outer electron shell so reactivity is low
- Used as a shielding gas to stop hot metals from reacting with the air, can put Argon inside light bulbs to stop the hot metal filament from burning away, Argon used in sealed cases to protect old, fragile, historical items (preservation).

Ares is the god of war, but also the god of **emptiness after conflict**, the barren field, the cold aftermath. Mars the planet mirrors that: It has the ingredients for reaction, but not the pressure or density to make them come alive.

VENUS & MARS

VENUS	MARS
Thick Atmosphere	Thin Atmosphere
Reactive Non-Metals	Reactive Compounds that Cannot Fully React
Visible Clouds	Invisible Gases
Visible Chemistry	No Greenhouse Strength
Heat Through Bonding	Cold through Lack of Bonding
Entanglement, Attraction & Relationship	Dissipation, Aftermath, Emptiness

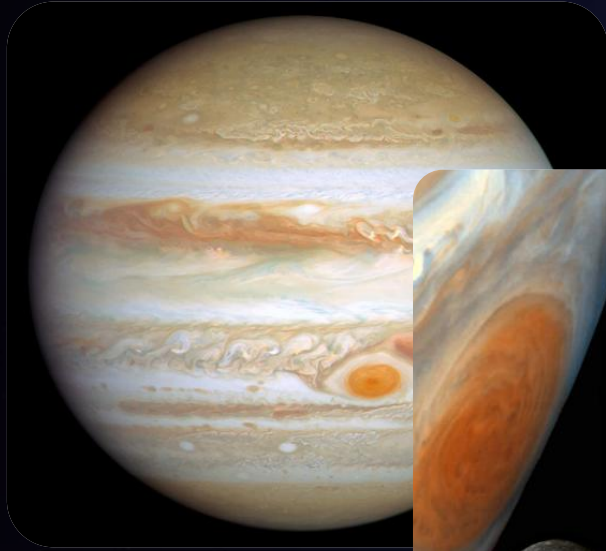

Venus is **chemistry in full expression**.

Mars is **chemistry in suppression**. It is inner turmoil, hidden conflict.

***Mars** is the god of war, but also the silence after the clash.

JUPITER

LARGEST

Moons

Io

Europa

Ganymede

Callisto

Io – a mortal Argive princess, daughter of an Oceanid nymph & daughter of the River God, Inachus

- Zeus turned into a heifer (cow) to hide her from Hera
 - Gaia created the violet so the cow could eat
 - She escaped to the Ionian Sea in Egypt, where she was restored to human form

Europa – a Phoenician princess, abducted by Zeus in the form of a white glistening bull. She is a descendant of Argive lineage and from Io

- Daughter of Agenor, Phoenician King of Tyre, or in The Iliad, daughter of the sun-red Phoenix
 - Etymology: wide, broad face
 - She arrived in Crete, became 1st Queen of Crete, had 3 sons with Zeus: two became judges of the Underworld (Minos, Rhadamanthus); Sarpedon fought in Trojan War.

Ganymede – a young Trojan boy that Zeus abducted to replace Hebe, as the cup-bearer, otherwise known as the constellation of Aquarius. He was a servant to the Gods serving them wine, ambrosia and nectar.

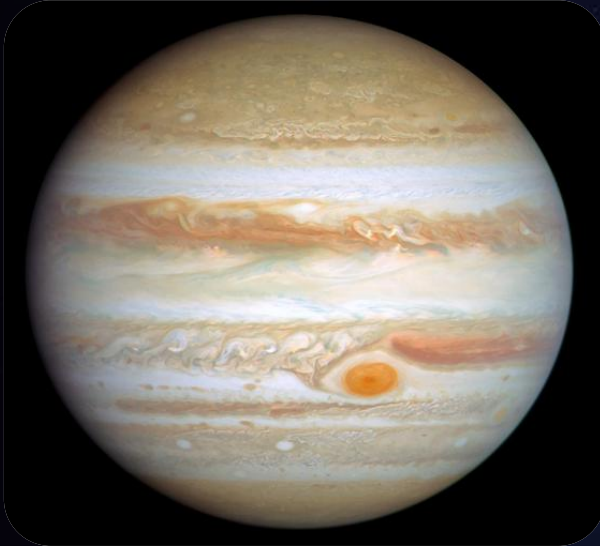

Callisto – a nymph, daughter of King Lycaon. Zeus transformed himself into Artemis, seduced Callisto as she slept with him. She became pregnant, and Hera transformed her into a bear. She is set into the constellation as Ursa Major.

JUPITER

LARGEST

JUPITER = TIN

Copper + Tin = Bronze

- **Tin** is Jupiter's metal. It symbolizes *expansion, generosity, largeness, benevolence*
 - It is soft, expansive, generous & workable: i.e., easily alloyed
 - It is used to create **bronze** when combined with **copper** (Venus)
 - Bronze is the metal of weapons, tools and art; it is the alloy that allows humanity to expand, conquer and build

LARGEST PLANETARY ATMOSPHERE IN THE SOLAR SYSTEM

- Equator Radius: 44,421 miles (or, deduced: 6)
- Polar Radius: 41,534 miles (or, deduced: 8)
- Mass is 318x greater than Earth
- 11x Wider than Earth (can hold 1,300 Earths)
- MOLECULAR HYDROGEN (76%): 1 electron, 1 proton (1:1 ratio)
- HELIUM (24%): 2 protons, 2 electrons, 2 neutrons (2:2:2 = 6)
 - When Helium is 'squashed' by Hydrogen, creates massive amounts of light & heat

Two most abundant elements on Earth are
Hydrogen & Helium

- Also two simplest & lightest, lighter than Air
 - Atomic Numbers of 1 & 2

ORBIT AROUND THE SUN:

- 11.86 Earth Years to complete 1 revolution (4,333 earth days)
- Oval shaped orbit
- Distance 483 million miles from the Sun (deduced: 6)

Bronze: Metal of growth, metal of civilization, metal of expansion, metal of dominion, metal of power

Jupiter: God of growth, god of civilization, god of expansion, god of dominion, god of power

The alloy mirrors the deity.

VENUS & JUPITER

Venus	Jupiter	Combined
Copper	Tin	Bronze
Full Expression	Full Expansion	Force that makes things <i>grow outward, declare themselves, become visible, take form, radiate, flourish, proclaim: to manifest</i>
Born from Titan (1 st Gen)	Olympian (2 nd Gen)	Cosmic Accident, Force of Nature
Conductive	Soft	Strong, tough against Rust, easy to shape
Brings visibility (appearance, expression, manifestation)	Dominates, expands, compounding, amplify, multiply	Form: <i>create structure, shape, civilization, culture, art, identity, destiny</i>

Venus = Expression / Manifestation

Jupiter = Expansion / Abundance

Venus + Jupiter = Form

FORM: The cosmic principle of *making something real*.

SUMMARY

Venus = The Goal (Manifestation)

Jupiter = The Result (Form / Expansion / Flourishing)

Venus is:

- the thing you want to bring into reality
- the thing you want to make visible
- the thing you want to express
- the thing you want to create
- the thing you want to reveal
- the thing you want to embody

Jupiter is **what happens when the goal succeeds.**

He is the *outcome, the form, the structure, the expansion, the abundance, the flourishing, the realized manifestation.*

Jupiter is:

- the result of expression
- the form created from manifestation
- the expansion of what Venus initiated
- the flourishing of what Venus revealed
- the abundance of what Venus expressed
- the structure built from Venus's spark

Venus is the **intention**.
Mars is the **activation**.
Jupiter is the **realization**.

Venus is the **seed**.
Mars is the force that cracks
the seed open.
Jupiter is the **tree**.

Venus is the **spark**.
Mars is the **ignition**.
Jupiter is the **flame**.

Venus is the **idea**.
Mars is the **action**.
Jupiter is the **world built from it**.

Mercury is:

- the **first movement**
- the **first awareness**
- the **first spark of thought**
- the **illumination**
- the **vision**
- the **message**
- the **breath before the intention**

Mercury is the lightbulb.
Venus is the decision.
Mars is the action.
Jupiter is the result.

SATURN

6

"SATURN"

SATURN = LEAD

SATURN TIED TO
GOLDEN AGE

ORBIT AROUND THE SUN:

- 29.4 Earth Years
- Moves at 21,637 miles per hour (9.5 AU from the sun)
- Distance from the Sun: 886 million miles (deduced to 3)
 - Tilt is at 26.73 degrees – creating slow seasonal changes

ATMOSPHERE:

- Molecular Hydrogen (92-97%)
- Helium (3-25% by mass)
- Trace amounts of Methane, Ammonia, Water Vapor
 - Zonal winds that reach up to 1800 km/hr, windiest place on earth
 - Visible cloud layers of Ammonia Ice, Ammonium Hydrosulfide, Water Ice
 - Saturn has weak gravity yet a thicker cloud deck compared to Jupiter
- Saturn radiates twice as much heat into space as it receives from the Sun; significant **internal heat**.

LEAD:

- Symbol Pb, Atomic # 82
- Soft, bluish-white heavy metal known for malleability, ductility & high corrosion resistance
- Ideal for radiation shielding, lead-acid batteries, construction materials like roofing & plumbing
- Major applications: vehicle batteries, ammunition, solder, X-RAY equipment

LEAD Effective at high shielding against high energy ionizing radiation

a time of feasting, role reversals,
free speech, gift-giving and revelry.

SATURN

6

SATURN = LEAD

SATURN TIED TO
GOLDEN AGE

- Saturn is not interested in the spectacle of war. He is interested in the **consequences** of war.
- He is not interested in tactics. He is interested in **limits, structure, time, reality, mortality.**

SATURN as the Counter-Force to Jupiter:

- ❖ He is the **boundary** that makes Jupiter's form *real* instead of infinite.
- ❖ He is the **container** that gives Jupiter's expansion *shape*.
- ❖ He is the **limit** that gives Venus's manifestation *discipline*.
- ❖ He is the **structure** that gives Mars's activation *direction*.

"SATURN" (Revisits the Past)

Venus is the **intention**.
Mars is the **activation**.
Jupiter is the **realization**.
Saturn says: **pause, reflect, think**.

Venus is the **seed**.
Mars is the force that cracks the seed open.
Jupiter is the **tree**.
Saturn offers it **shape**.

Venus is the **spark**.
Mars is the **ignition**.
Jupiter is the **flame**.
Saturn (Hera) is the **contract**.

Venus is the **idea**.
Mars is the **action**.
Jupiter is the **world built from it**.
Saturn says: **What are the consequences of this world?**

Saturn is: **The Bridge**

- Saturn is not Olympian; he is the last Titan; so a bridge between worlds.
- Saturn *could* be Hera, as someone who refines a character through labor prior to achieving greatness.

Saturn as a Firmament;
Saturn as "Hephaestus"

Saturn is:

- Contraction & Limitation
- Boundaries, Definition
- Structure that holds Heaven in place
- Membrane between realms

Saturn is the **old mind**, the **cosmic mind**, the **inevitable mind**
Saturn: The Mind of Time, The Mind that Judges, The Mind that Defines.

URANUS

URANUS: THE OG

REMAINS GREEK:
Ruler of the Sky
First Generation

"URANUS" (as the Present Time)

ORBIT AROUND THE SUN:

- 1 Revolution = 84.02 Earth Years
- Poles get 42 years of sunlight; followed by 42 years of darkness

ATMOSPHERE:

- Hydrogen (83%); Helium (15%), Methane (2.3%) – methane absorbs the red light that gives it a blue hue (illusion)
- Ice Giant: contains water, ammonia & methane (not a gas Giant like Jupiter & Saturn).
- Uranus is the coldest planetary atmosphere (neg 371 F)

GREEK MYTH:

- "Ouranos" – 1st generation Greek God, personifies the sky and heavens; emerged from Gaia
- Fathered the 12 Titans (6 Females, 6 males):
 - **Male Titans:** **Cronus** (Time), **Oceanus** (Ocean), **Hyperion** (Light), **Coeus** (Intellect), **Crius** (Constellations), and **Iapetus** (Mortality). ***Oceanus** did not take part in the over-throwing.
 - **Female Titanesses:** **Rhea** (Motherhood), **Theia** (Sight), **Themis** (Divine Law), **Tethys** (Fresh Water), **Phoebe** (Prophecy), and **Mnemosyne** (Memory).
- Gaia (as Earth) could not handle the pressures of such children; so she conspired with Cronos to overthrow Uranos. One cannot impound light, intellect, mortality, motherhood, slight, divine law, prophecy and memory. Time will always free it.
- After castration and losing 'manhood' – Uranus withdrew, and became a **Silent God**. He no longer intervened.

URANUS

URANUS: THE OG

REMAINS GREEK:
Ruler of the Sky
First Generation

Uranus becomes a realm, not a personality

In Greek myth (after Castration):

- Uranus never comes down from the sky
- He never participates in Olympian politics
- He never fights
- He never advises
- He never helps
- He never punishes
- He never rewards

He is present, but not active.
He is seen but not heard.
He is felt but not expressed.
He is the silent sky, the upper dome, the
untouchable realm.

Astrology says Uranus is:

- shocking
- rebellious
- disruptive
- chaotic
- revolutionary

But the planet Uranus is:

- ✓ extremely stable
- ✓ extremely cold
- ✓ extremely quiet
- ✓ extremely slow to change
- ✓ extremely uniform
- ✓ extremely detached
- ✓ extremely distant

Even his downfall is passive — he is overthrown by Cronus, not through battle, but through **removal**.

Uranus is about facing yourself, turning inward.
Uranus is about the still, present moment.

He is not the storm. He is not the lightning. He is not the upheaval.
He is the **stillness above all storms**.

NEPTUNE

8

Not associated with metals

Neptune gives form by **revealing** what was already there but unseen.

He is the god of:

- discovery
- immersion
- surrender
- exploration
- revelation
- the unknown becoming known

Light that requires exploration to be found.

- ☐ Not Saturn's structured light.
- ☐ Not Jupiter's expansive light.
- ☐ Not Mercury's revealing light.

Neptune's light is **hidden**. You must **go to him** to see it.

"NEPTUNE"

ORBIT AROUND THE SUN:

- 164.8 Earth Years to complete 1 Revolution
- Distance: 30.1 AU
- Season Changes: Every 41 years
- 17x the mass of Earth

ATMOSPHERE:

- Neptune's atmosphere is a deep, dynamic layer composed primarily of hydrogen, helium, and methane, driving the fastest planetary winds in the solar system.
 - Wind speeds up to 1,200 mph
 - Has no well defined surface; it is gas and liquid (like Ocean water)
- Planet has a "Great Dark Spot" on it
- Cold Temps; Farthest from the sun

PLANETARY STRUCTURE

GOLDEN IDEA	ATTRACT	ACTION	RESULT	FORM	PRESENT MOMENT	DISCOVERY
MERCURY	VENUS	MARS	JUPITER	SATURN	URANUS	NEPTUNE
Swift Messenger, the Light-Bulb	Requires Bonding: Law of Attraction	Iron Age	Bronze Age * (with Venus)	Golden Age	Silent God	Hidden light (truth discovery)
Taking the smallest idea....	Brings visibility (appearance, expression, manifestation)	Inner Turmoil *Can lead to explosive reaction	Expanding Upon the Future	Boundaries & Limitations	Facing Inward	Depths of the Unknown
An exchange, a marketplace	Attracted to Form, Shape, Structure	Emotional Weakness: Fear & Grief	Expansion of what Venus initiated	Membrane between Realms; the Bridge	Cold, Quiet, Detached, Distant	Dissolving boundaries; offers hope when none seems there.
Financial Gains	Connecting Force (relies on something else)	Emptiness After Conflict	God of growth, god of civilization	Structure & Form	Stillness before the Storm	Direction After Drifting
