

Apple Spice Dump Cake for the Multi-Cooker

(Recipe courtesy of Fun Loving Families)

Ingredients

- 21 ounce can apple fruit filling
- 1 box spice cake mix – you'll use ½ of the mix
- 4 tablespoon butter unsalted
- 1 cup water
- 1.5 qt round baking dish
- foil

Directions

Add water to the multi-cooker and place trivet inside. Grease or spray non-stick spray inside the baking dish and set aside.

Add apple fruit filling to the dish and sprinkle ½ package of the cake mix on top of the apples.

Cut butter into slices and cover the cake mix. Cover the baking dish loosely with foil. This helps protect it from getting water onto the cake.

Cook for 25 minutes. Allow 'natural pressure release on the multi-cooker.

Remove the baking dish from the multi-cooker and serve. Add a dollop of your favorite ice cream to kick it up a notch!
