WHY A WATERKING

- Adequate choice of chassis
- Dry side body provides flexibility and the opportunity to mount additional equipment and add additional compartments after completion of apparatus body.
- Choice of Galvanneal or Extruded Aluminum body
- Poly body now available!
- Flange welded body
- Various dump valve options
- In excess of 50 cubic ft. of hosebed on top of the apparatus
- The tank won't visibly sweat which leads to less chance of paint deterioration
- Dry side allows for free floating tank, no need to be tied down
- 6" overflows on tank for faster filling and dumping of the tank
- Larger & more accessible compartments
- NFPA 1901 compliant lid on the tank for inspection and cleaning
- Extremely low center of gravity
- Completely enclosed folding tank compartment painted, and mounted to the body of the apparatus, not the tank
- Portable and PTO pump options
- EZ climb ladder option for ease of access to hosebed & fill towers.

MANY ADDITIONAL OPTIONS AVAILABLE!
