SPOTLIGHT ON MAINTENANCE

We're turning the spotlight on our Turner Homes maintenance crew. When you need something fixed at your home, they are the first line of defense to assess the situation and make any repairs within their scope of knowledge. If it's beyond what they can do, they will make the necessary arrangements to schedule a professional for your situation.

We get calls for all sorts of home maintenance, from big to small. One of the most common calls we receive is for clogged sinks and toilets. Over time, drains can get clogged, and it's usually a quick fix. However, one of the biggest problems we discover with clogged toilets is residents using "flushable wipes." Flushable wipes are a misnomer! Flushable wipes should NOT BE FLUSHED AT ALL! The correct way to dispose of a flushable wipe is in the trash. If you currently use flushable wipes, please make sure to throw them in the trash, not down the toilet!

Another frequent maintenance call is to replace batteries in smoke detectors, carbon monoxide detectors, thermostats, and garage door openers, along with replacing burned-out light bulbs. We carry a good supply of assorted battery sizes, so we should be able to do that request quickly. Replacing a light bulb may not be so easy to do yourself, and we are happy to come out and do it for you. Please do not climb on ladders to change bulbs.

One of the most bothersome things the maintenance staff deals with is pests! Whether it's insects or rodents, they can be hard to get rid of. We start by baiting or trapping, and most times, thankfully, that helps, but occasionally it takes a heavy-handed approach, and we have to call in the professionals. I think since I've worked here, just about every home has been invaded by ants at one time or another. We like to say the town of Turner is built on one big ant hill, if you didn't know.

When it's autumn and it starts raining, we start receiving calls about getting gutters cleaned. When it's spring or summer and the days start getting warmer, we get calls about installing air conditioners. This happens every year, and we anticipate this. This also happens with furnace filter changes. We try to be prepared for each season, but sometimes other maintenance jobs take priority. So, it may be a few days until we get to those requests. Don't let that discourage you from making the call. We'll add your job request to the maintenance log, and we'll take care of it as soon as time allows.

One last thing as a reminder. Please watch for toilets that keep running after flushing, or faucets that are dripping. All those drips add up, and before you know it, you could be looking at a costly utility bill. Nobody wants that. If you find your toilet running or your faucet dripping, please contact the office so we can send maintenance staff to fix it for you.

May the favor of the Lord our God rest on us;
establish the work of our hands for us—
yes, establish the work of our hands.
Psalm 90:17

November

Yet he has not left himself without testimony: He has shown kindness by giving you rain from heaven and crops in their seasons; he provides you with plenty of food and fills your hearts with joy."
Acts 14:17
