

# Dominick Maxheimer

## ***Help Fuel My Dream of Becoming a Pilot & Serving my Country!***

### **About Me**

My name is Dominick Maxheimer, and I'm a 16-year-old student at West Florida High School of Advanced Technology. I'm currently working toward my private pilot's license. Aviation has fascinated me since I was a child, and growing up in a Marine Corps family, I've always been surrounded by it. The idea of becoming a pilot has been a constant in my life. Watching my dad fly C-130s, hearing stories from my uncle who flew B-52s in the Air Force, and learning

from another uncle who worked on helicopters during the Global War on Terror have all inspired me not only to pursue a career as a pilot but also to serve my country.

### **Why?**

The private pilots license is more than just a certification, it represents a lifelong dream, a pathway to freedom, exploration, and the ability to connect people and places in ways I've always imagined but never had the means to achieve. For me, the PPL signifies not just personal growth, but the opportunity to be part of a community that values skill, precision, and the pursuit of excellence. Unfortunately, the financial barrier has kept this dream out of reach. I cannot achieve this goal on my own, which is why I am seeking assistance to turn this vision into reality. Your support would not just be a gift, it would be an investment in someone who is deeply committed to giving back to the aviation community. I will mentor aspiring pilots who face similar financial challenges and contribute to the community by sharing knowledge and inspiring others. Additionally, I plan to dedicate my time and skills to becoming a pilot in the Air Force and ensuring that the impact of this opportunity goes far beyond my personal achievements. This is more than just receiving my pilots license, it's about becoming a valuable asset, a dedicated resource, and a positive influence within the aviation world. Your support wouldn't just help me achieve a lifelong dream, it would set in motion a ripple effect of meaningful contributions to the aviation community.

Thank you for your time and consideration! Anything helps and a little can go a long way.
