

## TUNE PRO X

Measuring your barrel for correct tuner fit.

Muzzle end / Threading end

0

35mm

70mm

1. Please ensure measurements are to 0.00mm or 0.000"

2. Please measure the 3 locations 0mm, 35mm and 70mm in the horizontal and vertical plane as barrels are often out of round in a dovetail area.

We just need the largest measurement at each location.
