

Oxford Numerology University®

Detailed Course Curriculum

Certified Numerologist (Year One Programme)

The first year of study consists of 10 thematically structured modules, designed to offer comprehensive training in modern numerology. Each module integrates both theoretical insights and practical applications. The curriculum aligns with the European Occupational Standard for Numerologists (COR 516102).

1. **The Most Relevant Numerological Knowledge**

Foundational principles and contemporary applications of numerology, essential for a professional practice.

2. **The Right Partner and the Challenges of the 21st Century**

Compatibility patterns, modern relationship dynamics, and how numerology addresses emotional and relational challenges.

3. **Wealth Numerology – Money, Abundance and Prosperity**

Financial and professional patterns revealed by numerology, including individual strategies for abundance.

4. **Fate versus Destiny – When and How Life Challenges Us**

Understanding personal cycles, life lessons, and turning points as mapped through numerological patterns.

5. **Karma, Dharma and Tarot-Numerology**

An integrative approach to karmic and spiritual dimensions, combining classic numerology with symbolic systems.

— *Mid-Year Evaluation* —

6. **The Hidden Codes Within Names**

Name analysis and its impact on one's personal and professional path, including tools for name change evaluation.

7. **Numerology of Health and Wellness**

Exploring the connections between numerology and well-being, psychosomatic tendencies, and vibrational health patterns.

Oxford Numerology University®

8. Numerological Forecasting – Your Personal Agenda for the Year Ahead

Predictive analysis using personal year, month, and day numbers; strategic planning and timing.

9. Tools of the Modern Numerologist

Practical training in using digital tools (Google Drive, Zoom, Zotero), report writing, and professional chart design.

10. The Ethics of Modern Numerology Practice

Client confidentiality, responsible communication, legal considerations, and professional standards.

Total Study Hours: 1080 hours (360 hours of theoretical training and 720 hours of practical work, including lectures, assignments, case studies, and supervised mentorship).
