

WHY THE FREE PRECISION
HEALTH ACCESS PHONE
APP FOR YOUR HEALTH
RECORDS?

**SECURE, SIMPLE,
FAST & 100% IN
YOUR CONTROL!**

If you enjoy hospital food, you're going to love what healthcare is cooking up for you to "simplify" control of your health records.

Healthcare is by far the largest employer of nutritionists and dietitians in the US, and we all know the reputation of hospital food. So, when 600+ Electronic Medical Records (EMR) companies and the many Health Information Exchanges (HIEs) can't come up with a common format to exchange YOUR data, let's bring in the government as referee to set the standard. NO, let's not! We're with Erik Topol in his book, "The Patient Will See You Now". We dictate and command our own future!

PRECISION
HEALTHCARE TECHNOLOGY

WITH PRECISION HEALTH ACCESS YOU SET THE STANDARD & LET THEM ADAPT!

TEFCA - Trusted Exchange Framework and Common Agreement is an overly complicated process being created to make it easy for everyone except YOU to exchange YOUR health records. Case in point, how easy is it for you to navigate the many patient portals for all your physicians and healthcare facilities where you have been treated? TEFCA sets out to “simply” connect all these tentacles that are already far from simple.

Most healthcare record apps will say they are TEFCA compliant. So what? Everything in healthcare has the same security rules. Precision Healthcare Technology is present and can help you connect your records to 17 sectors of healthcare and health aware consumers worldwide. None of these other systems are connected to anything except TEFCA. No thank you!

When you download the FREE Precision Health Access App, YOU are in control, and YOU alone make the rules of how and who gets access. How much does Precision make when you download and use the app? Not one cent!

We're doing this because together we have one loud voice that makes healthcare serve US! EMRs will HAVE to recognize your/our will and then we will give our technology to connect your records to those companies, if you choose to do so, for FREE. Why? Our ONLY job is to make life easier and simpler for YOU and the healthcare providers that serve you. Period!

The European Union (EU) Set the Precedent - In 2022 the EU told Samsung, Apple and all device makers, that they would have to use the USB-C cords for all their devices, could not make you also buy the charger when you only needed a new cord, and that chargers must work for any device no matter the maker.

The Precision Health Access app lets you set the rules and makes the establishment adapt. And how can they object when we then give them access to our transfer technology for free? Healthcare will not change itself. It's up to US to deliver the change that we demand!

[Precision Life Benefits](#) will always be “[ad free](#)” and offers three completely OPTIONAL tiers of benefits – FREE services, a subscription-based service with unlimited individual or family virtual care for less than most streaming services, and an a la carte for many health access products and services.

With certain corporate partners we donate a portion of this minimal relative revenue to the nonprofits and charities they support. [Perspective](#) – If we have 100 million downloads and we do not make one cent on other services, we together “[Change Healthcare to Lifecare](#)”! That message is “**The best life and health assurance you can have for you and your family is FREE**”! Thank you so much for sharing this message widely.

**Though we do not allow ads, nor pay companies for exposure, if your interest, condition or medical necessity shows a need, you may be directed to options that may benefit you. These are not paid ads but rather services of valuable companies who have also shared our message to their clients and partners list.*
