	Yellow Squash				
	Wax beans/wax Watercress				
	Zucchini				

Summer Food Chart

*Nuts and seeds should be soaked in distilled water for 4 to 8 hours before eating to release the inhibitors for easier digestion and absorption of fat and water soluble.

Local organic food is the best, however, if you purchase organic food that is not local, make sure it was not picked immature because it may be lacking vital nutrients.

If you purchase nonorganic food, there are washes on the market that can be used to reduce the toxicity of the herbicide or pesticide. Food grade Hydrogen peroxide may also help.

Make sure all fruits and vegetables are ripe before you consume them, this way you will get the full benefits of their nutrients and a high alkaline stasis.

Fish *	Herbs	Bean Sprouts
Anchovies	Basil (<i>Ocimum spp</i>)	Adzuki
Butterfish	Chives	Alfalfa
Cod	Cilantro	Broccoli
Flounder	Dill (<i>anethum graveolens</i>)	Clover
