# Windows 11

**Windows 11 is the newest operating system released by Microsoft. This operating system features an all-new simplified and modernized interface designed to increase productivity and creativity. One of the many new features include multiple desktops. Users can create and customize individual desktops for many different applications such as work, home, personal, gaming etc.... Windows 11 also comes with personalized Widgets. Rather than using a phone to check news, weather or notifications, users are now able to use their Windows 11 desktop to create personalized content in order to view all of these and more!**
