## The Edison: An American Bistro

May 4th, 2022

### **Entrance**

For the entranceway, it feels important to immediately wow the customers with the atmosphere of the bistro. With a large, bright, mesmerizing light sculpture in the center of the waiting/gathering area so that we are able to captivate the guests in the atmosphere of the space. On either side of this column of light, we see the bar, and the hightop, both illuminated with Edison bulbs as an extension of the pulsating light sculpture. It invites us to enter the warm space, prepared for an experience.

### **Dining Room**

As we make our way out of the entrance and into the main dining room, we are greeted by a blanket of light suspended above the guests. This 'wave' will create the texture of the room and allow the room to have a movement and a breath of its own. With water-like movements, the ceiling will captivate the guests throughout their dining experience. On top of that, tables will be individually lit to allow a feeling of immediate intimacy, while still feeling connected to the whole room through the ceiling sculpture.
