

Partner with Notarize

Notarize enables innovators to quickly bring remote online notarization into a wide range of use cases - whether via on-demand third-party notaries, employee notaries, or a combination of both.

By abstracting the technological, operational, and compliance complexity of remote online notarization, the Notarize solution drives enhanced business results, faster developer velocity, and differentiated user experiences that stand out.

Meeting the digital-first challenge

- Use the leading RON platform within your own ecosystem to enable customers to initiate secure, compliant, and fast remote online notarizations.
- Notarize prioritizes regulatory compliance by using knowledge-based authentication (KBA), credential analysis, and secure transactions.
- Average connection times to notaries via the Notarize platform occur within a matter of seconds.
- Our API-driven architecture enables fast and frictionless integrations, which helps Notarize meet the needs of enterprise-grade solutions focused on risk, security, and compliance.

We have you covered!

The Service

Use the Notarize 'Notary On-Demand' (NOD) service to connect to a commissioned and trained notary on the Notarize platform any time of day or night and ensure maximum responsiveness

The Platform

Use the 'Bring Your Own Notary' (BYON) service with an in-house notary who has been vetted on the Notarize platform in order to fully own your customer experience

Together

Use a combination of in-house notaries and a panel of third-party notaries depending on the time of day and the availability of in-house notaries vs. target service levels

Benefits

Reduce car travel, paper printing, and other environmental waste through a purely digital solution

Cut days from the document finalization process by notarizing on a secure two-way video call. The average connection time occurs in seconds, and notarizations typically take around 15 minutes

Utilize Notarize's open and well-documented APIs to flexibly deploy RON into your technology

Build within an enterprise-grade compliance and security environment, featuring direct support from subject matter experts in regulation

Utilize Notarize's scaled notary pool to achieve superior response time SLAs

Verify identity quickly using technology to perform a multi-factor authentication including dynamic KBA and credential analysis

Preserve flexibility with "where you left off in the document" multi-party capabilities

Work with a partner that is unwavering about compliance. Notaries can access their notary journals and video recordings of notarial sessions on the Notarize platform

Deliver an exceptional customer experience with a partner that has a 4.8+ out of 5 star rating on Trustpilot

About Notarize

Notarize is a digital platform that uses technology and live human interaction to establish identities. We are one of the first notary public platforms to allow any person or business to get their documents legally notarized online, 24/7. Our mission is to help people execute the most important transactions of their lives and to make notarization more convenient, secure, and verifiable. Our platform creates a secure digital signing table that notaries public may use to conduct electronic notarial acts utilizing communication technology while obtaining satisfactory evidence of identity of the remotely located individual. Our goal is to build trust in a digital age through a protected online transaction. For more information, please visit [notarize.com](https://www.notarize.com).
