# Workato's Workbot for Workplace

Creating powerful experiences for enterprise collaboration & automation

workato

Workato is the operating system for today's fast-moving business. Recognized as a leader, Workato helps people get work done faster by connecting their applications, databases, and systems.

Workplace
from FACEBOOK

Connect with everyone in your organization, whether workers in HQ or on the frontline. Super-charge the powerful collaboration features like groups, chat, and live video with the automation power of Workato, to get people automating and getting work done, together.

Connect and accelerate work
Securely connect to all your business apps using Workbot; from HR, to support, to engineering, and enable teams to access data and complete tasks directly from Workplace.

Build smarter bots
Improve the conversational intelligence of your bots by embedding insights from sentiment analyzers, intent detectors, and other AI.

Make your bots more human
Build bots that allow for human interaction with workflows such as approvals and requests.

Build an ecosystem of bots
Build custom bots for HR, Communications, Customer Support, and IT teams that connect to relevant applications to provide a personalized experience.
