Designing a great kitchen is a complicated task with many things to take into consideration. Storage is often overlooked, but the inside of your cabinets is as important as your door and drawer fronts.

To discover how careful planning can make the most of your kitchen design, ask your retailer for a copy of our Beautiful on the Inside magazine.

## WALL STORAGE

## SHELVING

## 300MM BASE UNIT PULL-OUT

## CHOOSE YOUR LOOK

Including clever storage isn't just about the functional benefits, matching the look to suit your doors & worksurfaces means you're not just making your kitchen more user friendly and easier to work in, you're making it *beautiful on the inside*.

### Wire Bases

Even price sensitive designs can include clever storage when wire based products are selected. While still benefiting from world leading Kesseböhmer product quality, wire based trays keep the cost down without compromising on the functional benefits.

**SILVER CLASSIC** - Powder coated wire tray

### Chrome Arena

Boasting anti-slip solid bases, chrome products typically lend themselves to classic kitchen designs, and with a choice of round or flat gallery rails you can create a look to perfectly complement your kitchen design.

# Larder storage

From unpacking shopping to preparing meals, our range of larder solutions don't just speed up the chores and make jobs in the kitchen simple, they also ensure all your groceries are easier to see and reach, so food waste is dramatically reduced.

## Which Larder do I need?

### The Dispensa

Typically used in slimmer larder units, the Dispensa larder allows complete access and visibility to the entire contents of the cabinet in one movement, and Kesseböhmer's market leading quality ensures that even when fully loaded with 100kg of groceries, the unit moves smoothly with minimal effort.

### The Tandem Side

Even when planning on a budget, you can still enjoy the functional benefits of clever storage. The Tandem Side shelving system means you'll double the access and visibility of each part of your wide larder by splitting each level in two. What's more, clever German engineering means that the weight of the groceries on the door shelf is transferred back in the cabinet, so hinges aren't put under stress and your door won't move over time.

### The Tandem Solo

Simply open the door and the entire content of the cabinet is effortlessly pulled forward towards you.

### The Convoy

The last word in luxury, our Convoy range is available with glass and wooden shelving elements giving a premium aesthetic to your internals.

## The Tandem

The original and the best; our most popular solution for wider larder units combines the functional benefits of the Tandem Side and the Tandem Solo. By splitting each level in two, the overview of the cabinet contents are doubled, whilst the rear shelves are automatically drawn forward as the door is opened.

# Corner Storage

ADJUSTABLE  
TRAYS

Planning an L or U shaped kitchen can mean wasted space in corner cabinets. The Kesseböhmer LeMans is the world's best-selling kitchen storage product, and with an impressive 25kg weight capacity per shelf it's perfect for easy storage and access of heavy plates, crockery, pots and pans.

The Moveboard provides an entry level alternative to the LeMans for value driven kitchens

# Wall storage

Whilst wall cabinets can provide extra space for storage, higher sections are often left inaccessible for many. The iMove provides easy access to upper shelves, without compromising on aesthetics.

# Bespoke Shelving

Open and broken plan living continues to be a trend; using shelving instead of cabinetry can make spaces feel larger, without compromising on storage space.

Kesseböhmer's YouK storage system can be designed to fill different height, widths & depths to complement or replace traditional cabinetry

# Base Units

Slim base units don't always typically suit traditional drawers. Kesseböhmer base pull-outs provide instant visibility and access to all areas of a base unit in one movement; perfect for maximising useable cabinet space.

Even a 150mm space can provide a surprising amount of storage for groceries

# Drawer inserts

We have developed a comprehensive range of modular elements for deep & shallow drawers; no matter how wide your drawer units are, cutlery inserts are available with a variety of additional optional components to organise everything from knives and spices, to cling film and crockery!

Ask your retailer for a copy of our Beautiful on the Inside for more ideas and inspiration.

# Waste & recycling

Waste management and recycling has never been more important. When planning your new kitchen, be sure to carefully consider where & how waste food and empty packaging will be stored.

## Base mounted

Housed behind hinged doors typically in slimmer cabinets, these bins can be easily pulled out with the lid remaining in place.

Pull-out solutions are a cost effective way to keep your kitchen free from unsightly free-standing bins.

## Door mounted

For maximum convenience and capacity, bins can be mounted to the rear of doors. The range includes a soft close as standard, is available in light or dark grey, and is available with the option of fixed or removable lids.

Your kitchen designer will be able to advise on the best place to locate your internal bin.

## Drawer mounted solutions

Half height deep drawer units can provide a deceptive amount of space for both recycling and food waste; widths of up to 1000mm can hold up to 58l in multiple compartments.

The 9XL Waste Bin series is increasingly popular in modern kitchen designs

# Handles

Although small, handles play a big part in determining your overall kitchen look. Whether strong and structured, simple and contemporary, elegant and characterful, or full of exciting texture, our extensive handle collection offers something for every style and taste.

# Lighting

Lighting is no longer just a kitchen accessory, it's a necessity. Creating a tailored lighting plan in the early stages of your kitchen design, will not only make your space feel lighter and brighter, but it can add that all important wow-factor. Don't worry, your designer is there to help you to make those all important lighting choices - but here are some of the key design elements to consider.

## What do I need and where?

In selecting the most appropriate lighting for the various tasks being carried out in your kitchen, a good place to start is considering these three key lighting environments – Task, Mood and Convenience.

### Task Lighting

Task lighting provides effective light to undertake everyday activities such as food preparation. Perfectly positioned, task lighting makes the kitchen an efficient working space.

### Convenience Lighting

Convenience lighting has a more specific purpose. It is directional and intended to be focused towards a specific area or to be used for a particular job in drawers or in cabinets.

### Mood Lighting

Also referred to as feature, decorative or accent lighting, mood lighting is used to add dimension and depth to the room in order to create atmosphere and provide personality.

# Worksurfaces

Selecting the right worksurfaces is essential for creating a kitchen that not only looks great but also suits your lifestyle.

Our beautiful collection of worksurfaces offers something for every home in a wide variety of materials, patterns, shapes and finishes.

Here you'll find a small selection of worksurfaces to help inspire you. Don't forget to ask your retailer for your copy of our worksurfaces brochure, to experience our extensive collection at your leisure.
