Micro Scissors (Spring Type) with Round Handles  
Microtijeras (de muelle) con mangos redondos

BC

... with round handles

- Round handles allow turning manipulations between the fingers.
- Optimum balance individually for each instrument due to solid or hollowed-out handles.

... con mangos redondos

- Los mangos redondos permiten movimientos giratorios entre los dedos.
- Equilibrio óptimo por mangos macizas o huecas, según el modelo.

Micro Scissors (Spring Type) with Light Plastic Handle

Microtijeras (de muelle) con mango de plástico ligero

### The MÜLLER Micro instrument system

A top quality set for peripheral microsurgery. Numerous details tried and tested in practice mean increased efficiency and safety.

#### Natural holding position = increased sensitivity

- The light plastic profile increases the grip surface, thus guaranteeing a natural hand position without cramping and providing enhanced sensitivity.

#### Easier rotation = extended working area

- The round grip cross section permits easy and uniform rotation of the instrument. This extends the application and working areas.

#### Safe grip

- Optimum handling
- Development in accordance with ergonomic criteria and the low weight of the new plastic grips provide fatigue-free working and optimum handling.

### Microinstrumentos de MÜLLER

Un juego de calidad superior para la microcirugía periférica.

Numerosos detalles probados y examinados en la práctica llevan a una efectividad y seguridad elevada.

#### Posición de agarre natural = sensibilidad elevada

- El perfil de plástico ligero aumenta la superficie de los mangos y garantiza así una posición natural de la mano sin fatiga, como también una mayor sensibilidad.

#### Rotación más fácil = aumenta el campo de intervención

- La parte redonda del mango permite la rotación fácil y uniforme del instrumento. Esto aumenta el campo de intervención.

#### Agarre seguro

- Manejo óptimo.
- El desarrollo según aspectos ergonómicos en combinación con el peso mínimo de los mangos de plástico permite un trabajo sin fatiga y un manejo óptimo.

## Scissors - Tijeras

DUROTIP® **W**avecut Ligature Scissors

Tijeras DUROTIP® para ligadura con corte ondulado

BC

especially for cutting suture materials

■ Carbide inserts guarantee permanent cutting edge (also in the distal area of the blades)

■ **W**avecut prevents suture materials from slipping out

■ DUROTIP® ligature scissors are identified by 1 goldplated ring

especialmente para cortar material de sutura

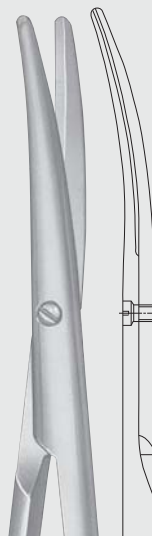

■ Plaquitas de acero extraduro garantizan permanentemente un buen corte (igual que en la parte distal de las hojas)

■ El corte ondulado impide el deslizamiento del material de sutura

■ Las tijeras DUROTIP® para ligaduras están marcadas con 1 anillo dorado
