Micro Forceps with Lightweight Plastic Handle

Micropinzas con mangos de plástico ligero

The MÜLLER Micro instrument system

A top quality set for peripheral microsurgery. Numerous details tried and tested in practice mean increased efficiency and safety.

Natural holding position = increased sensitivity

- The light plastic profile increases the grip surface, thus guaranteeing a natural hand position without cramping and providing enhanced sensitivity.

Easier rotation = extended working area

- The round grip cross section permits easy and uniform rotation of the instrument. This extends the application and working areas.

Safe grip

- Optimum handling
- Development in accordance with ergonomic criteria and the low weight of the new plastic grips provide fatiguefree working and optimum handling.

El sistema de microinstrumentos de MÜLLER

Un juego de calidad superior para la microcirugía periférica. Numerosos detalles probados y examinados en la práctica llevan a una efectividad y seguridad elevada.

Posición natural de agarre = mayor sensibilidad

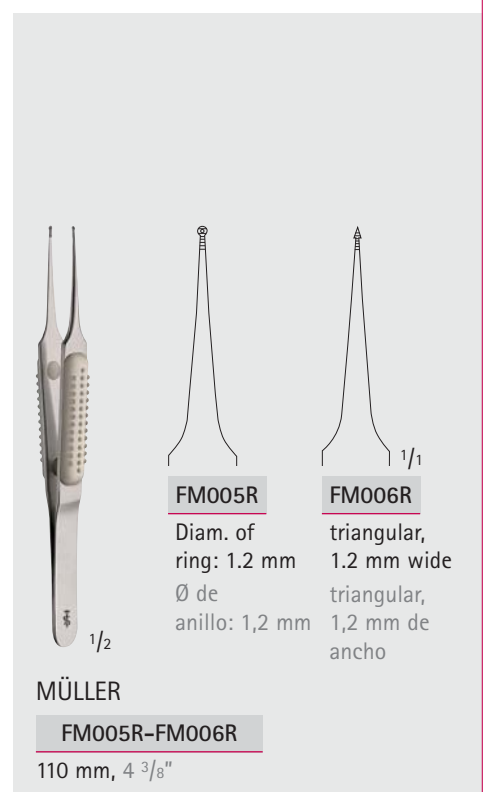

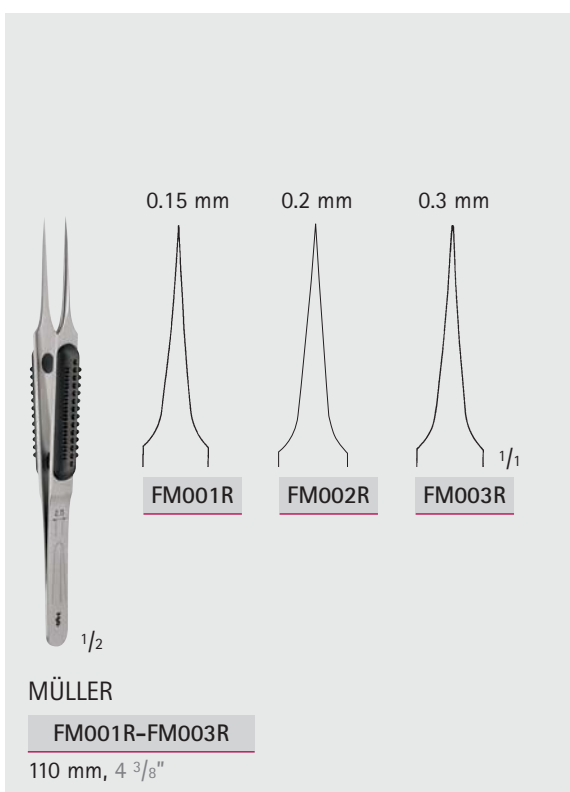

- El ligero perfil de plástico incrementa la superficie de agarre, garantizando así una posición natural de la mano libre de calambres y proporcionando mayor sensibilidad.

Rotación más fácil = aumenta el campo de intervención

- El corte transversal redondo de la superficie de agarre permite una rotación sencilla y uniforme del instrumento. Esto aumenta aplicaciones y campos de intervención.

Agarre seguro

- Manejo óptimo
- El desarrollo siguiendo criterios ergonómicos en combinación con el bajo peso de las ramas de plástico permite un trabajo sin fatiga y un manejo óptimo.

Micro Suture Tying Forceps with Round Handle

Micropinzas para anudar suturas con mangos redondas

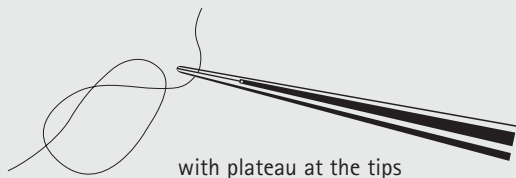

... with round handles

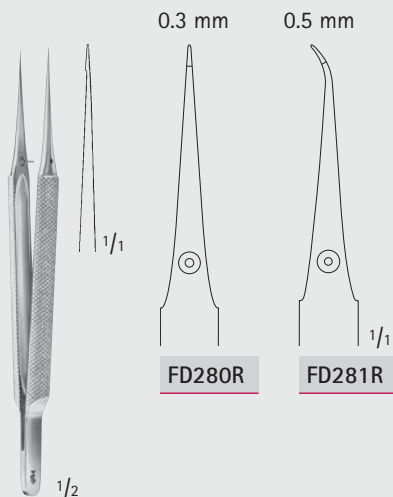

- Round handles allow turning manipulations between the fingers.
- Optimum balance individually for each instrument due to solid or hollowed-out handles.

... con mangos redondos

- Los mangos redondos permiten movimientos giratorios entre los dedos.
- Óptimo equilibrio individual para cada instrumento, ya sea por medio de mangos sólidos o huecos.
