A THREE PART VIRTUAL SERIES FOCUSED UPON DIARMUID'S LATEST BOOK:

BEYOND THE PANDEMIC SPIRITUAL AND ECOLOGICAL CHALLENGES

During the most challenging days of the Covid 19 pandemic many of us began to consider what a "new normal" could look like, how might we alter our ways of living in this world to create a more life-giving and life-enhancing environment for all. Could this be the wake up call that caused us to pause and re-imagine a different future? Those voices seem more silent now. Let's take the opportunity as Covid variants continue to mutate to discover what we may need to learn from this experience. What is a vision, a spirituality that may guide us?
