THE SPACEMONT TEAM

SAGEMONT
PREPARATORY SCHOOL

These are all the team photos we collaborated on to make this presentation. These pictures show how each of us collaborated to make the mailbox happen in which we took such things as measurements, and planned out how it would look in the bottom left corner you are able to see the 3d version of our mailbox idea.

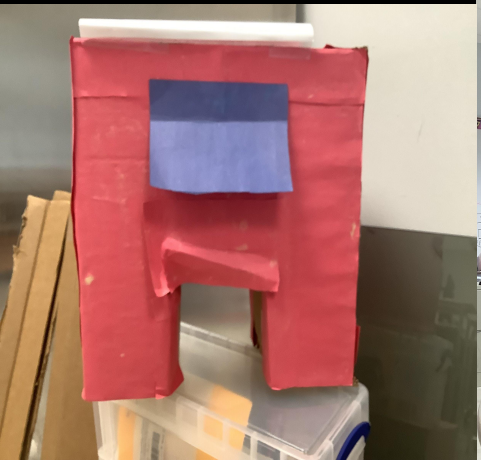

These images show how we progressed from finding the materials we needed to using them to make it reality and be able to work as a team.

SAGEMONT
PREPARATORY SCHOOL

These images below showcase the comparison of all of the different rough drafts and evolution's of our mailbox challenge. Also how we expanded and worked on unitedly and combined our ideas to complete the mailbox. Lastly to see the progress of how the mailbox evolved throughout time you may be able to look at the pictures from left to right to see the first ever mailbox we made to the last version.

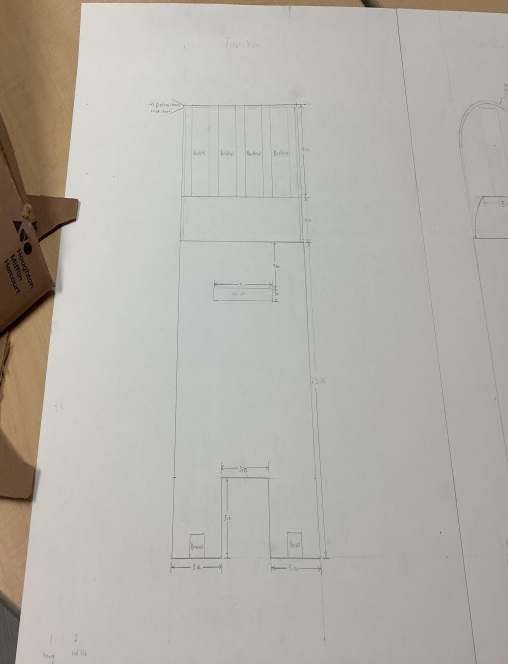

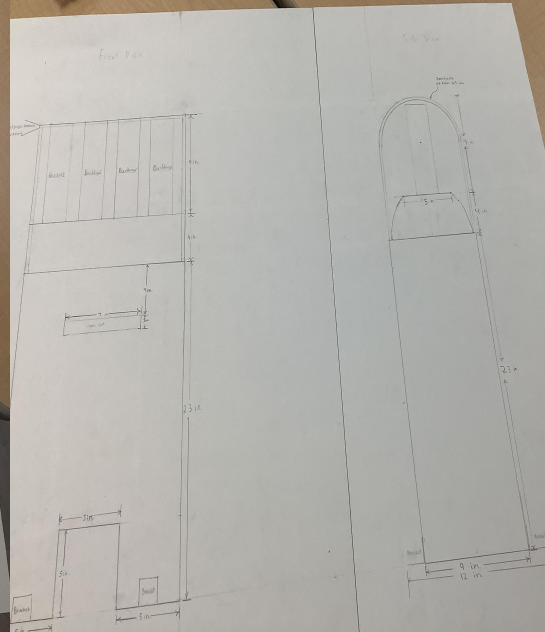

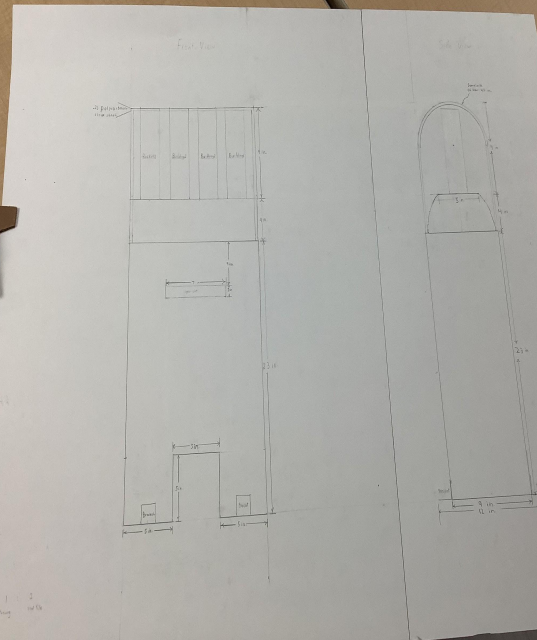

Additionally these images showcase the final version of the mailbox views of Front, Side, and Back.

Lastly these images
show the scaled
drawings of the mailbox
we made to be able to
plan how we were going
to build it as a team.
