Block-Staff Token (\$STAFF): Empowering Block-Staff Ecosystem Participants

Abstract: This whitepaper outlines the features and tokenomics of Block-Staff Token (\$STAFF), a utility token built on the Avalanche blockchain. \$STAFF aims to reward ecosystem participants, including customers and candidates, by creating a robust and sustainable token economy. The whitepaper provides an overview of fundamental token metrics and features. It also details the mechanisms in place to maintain a balanced token supply, ensuring long-term value for stakeholders.

1. Introduction:

Block-Staff Token (\$STAFF) is a deflationary utility token designed to incentivize and reward users within the Block-Staff ecosystem. By leveraging the Avalanche blockchain, \$STAFF aims to create a secure, scalable, and efficient platform for participants to engage with various services, while fostering the growth and development of the ecosystem and incentivize its participants. The initial fair launch aims to assign a fair market value to the token before its full adoption in Block-Staff ecosystem.

2. Token Utility

Following full rewards pool unlock, \$STAFF will be used to reward ecosystem participants, i.e. users of Block-Staff services (clients and candidates) in form of loyalty rewards,

Participants will be able to redeem the tokens for additional services or use them for payment for core services. They will also have the option to realize monetary value of awarded tokens by selling them on the open market. In addition, \$STAFF will be used to power a blockchain – based and AI utilizing staffing platform, set to be developed in collaboration with partners and launched in Q42027.

3. Token Supply and distribution:

The screenshot shows the Snowtrace interface for the Block-Staff Token (\$STAFF). The top navigation bar includes 'All Filters', a search bar, and links for 'Home', 'Blockchain', 'Tokens', 'Resources', 'More', and 'Sign In'. The main content area displays the token's overview and profile summary.

Overview		Profile Summary	
PRICE	FULLY DILUTED MARKET CAP @	Contract:	0x1b1d95b8d751b7de71f7a76ce0E0e66ecA8d219
\$0.00 @ 0.000000 AVAX	\$0.00	Decimals:	18
Total Supply:	65,000,000 STAFF

Total Supply: 65.000.000 \$STAFF

Maximum Supply: 70.000.000 \$STAFF

The total initial supply of Block-Staff Token (\$STAFF) is set at 65,000,000 tokens. These tokens will be utilized to drive the growth and adoption of the ecosystem, while maintaining a fair and sustainable token distribution.

34,499,999 \$STAFF will be sold in a public crowdfunding presale and is locked. Tokens will be distributed to investors proportional to the capital allocation.

34,499,999 \$STAFF will be used for liquidity pooling and is locked. Liquidity pool will be open for public trading.

2 \$STAFF tokens have been kept in deployment wallet, for testing purposes

Additional token mint:

Additional 5,000,000 \$STAFF tokens will be minted following liquidity pool launch, reaching a supply cap of 70.000.000 \$STAFF tokens. No more tokens will be minted beyond this point.

These tokens will be subject to linear unlock over period of 20 months. and allocated as follows:

Rewards pool – 50%; Team – 25%; Marketing and partnerships – 25%.

4. Release schedule

The entire initial token supply of (minus 2 testing tokens) will be in circulation following liquidity pool launch, no vesting schedule will apply. Initial price of \$STAFF upon pool launch will be equal crowdfunding round, which will incentivize early investors to hold their \$STAFF tokens. Concerns related to negative price action following liquidity pool launch are therefore less significant.

The additional mint of 5.000.000 \$STAFF will be subject to linear unlock over a period of 20 months, with no cliff. 50% of every unlock will be locked in a rewards pool and used for rewards, following rewards pool unlock.

The exact rewards mechanism, i.e. individual rewards allocation will be voted on by token holders. There are 2 major rewards mechanism proposals, both dependent on token price valuation and distribution following the 20 month unlock period. Other community proposals receiving majority of the votes will be including in the final voting, too.

We anticipate the token price discovery to take place within the initial 20 months from its launch on open market. This is a pre-requisite to a reward model ensuring not only fair rewards but also a fair distribution of the rewards pool.

5. Crowdfunding Presale:

50% of the total initial supply (32,499,999 \$STAFF tokens) have been allocated for a crowdfunding presale. Participants in the presale will have the opportunity to acquire \$STAFF tokens at a predetermined price. The presale is taking place on SUSHISWAP DEX in their MISO launchpad section. In order to participate, investors will need to connect with their wallets (Metamask, TrsutWallet, etc) set on Avalanche (AVAX) network. The crowdsale pair is \$STAFF - \$SUSHI, with presale price beign set at 0.033 SUSHI per one STAFF token.

100% of \$SUSHI raised will be used to launch a liquidity pool on SUSHISWAP DEX.

Minimum 25% of total token allocation will need to be sold in order for the sale to be successful. Any unsold token supply will be burned and tokenomics automatically adjusted proportionally to remaining supply, including the additional scheduled mint. The proportions of the tokenomics will be maintained.

6. Liquidity Pool:

All funds raised during the presale will be locked in a liquidity pool to ensure adequate liquidity for the \$STAFF token. Additionally, the remaining 50% of the total initial supply (32,499.999 \$STAFF tokens) will also be used for the liquidity pool. This will create stability and facilitate trading activities within the ecosystem.

Liquidity will be locked for maximum available lockup period on SUSHISWAP – 180 days.

.7. Reward Pool Allocation:

Out of the 5,000,000 minted tokens, 50% (2,500,000 \$STAFF tokens) will be allocated to a rewards pool. This pool will remain locked and will be gradually unlocked 20 months following the decentralized exchange (DEX) listing. The reward pool serves as an incentive for long-term participation in the ecosystem. Voting on rewards mechanism will take place before rewards pool unlock to ensure immediate rewards program deployment.

8. Marketing Allocation:

25% (1,250,000 \$STAFF tokens) of the minted tokens will be allocated to marketing efforts. These tokens will be utilized to raise awareness, promote the Block-Staff ecosystem, and drive user acquisition. The marketing allocation aims to enhance the visibility and adoption of \$STAFF. These tokens will be subject to linear vesting schedule across 20 months with no cliff.

9. Team Allocation:

The remaining 25% (1,250,000 \$STAFF tokens) of the minted tokens will be allocated to the core team. This allocation rewards the team for their efforts in building and maintaining the Block-Staff ecosystem, aligning their interests with the long-term success of the project. These tokens will be subject to linear vesting schedule across 20 months with no cliff.

10. Token Burning and Adjustments:

Detailed in the crowdfunding sale section; no further burns or adjustments will be made.

11 Summary of key facts:

Token name: Block-Staff Token

Ticker Symbol: \$STAFF

Logo: 

Total Supply: 65.000.000

Max. Supply: 70.000.000
