Data Sciencing Consultants

Dashboard and Spreadsheet experts: Helping you make sense of your data, allowing you to gain actionable insights and make confident, effective business decisions.

Services offered include:

Microsoft Excel Spreadsheet Mentoring

If you have a challenge with your Excel spreadsheets, you can book an appointment with us. Over Zoom or in-person, we'll guide you through the process to overcome your challenge. Either training you how to do it or just fixing it for you.
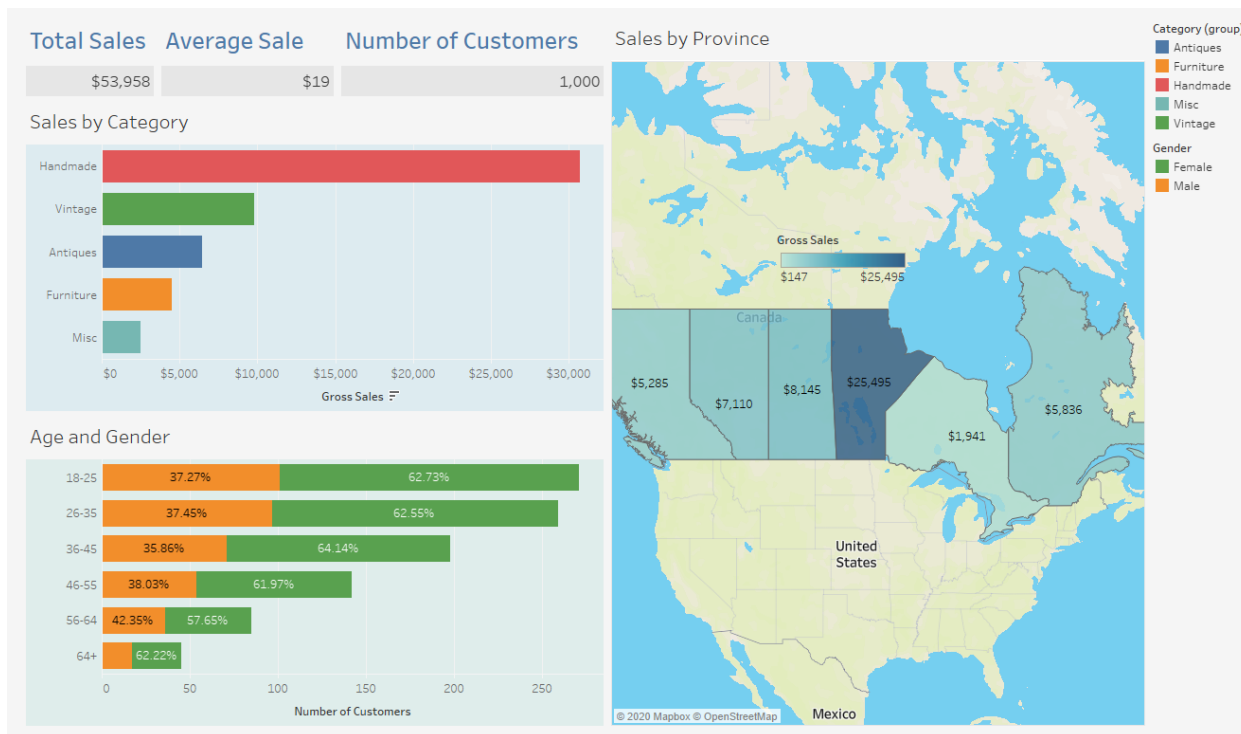

Data Visualizations

Using modern techniques and strategies we will create productive data visualizations (charts, graphs, etc.) for meetings, presentations, and reports. Creating an improved experience for yourself, your audience, and clients.

Data Science Consulting

Typically, a Data Science project consists of data analysis and developing actionable insights. Helping you understand what is happening in your company. For example: Figuring out what metrics are useful to track.

Designing Dashboards

Designing sophisticated, interactive dashboards for your business. Analyzing, and viewing even small bits of information can help you make more effective business decisions. Also, interactive dashboards can be used for data mining, to explore fresh, new insights for your business. The image below is an example of what an interactive dashboard can look like. On the actual dashboard you can easily click to filter by region on the map, or by categories, ages, etc.

Contact us to discuss if our services are right for your company. To help you spend more time on aspects of your business and life that you enjoy.
